

Non-surgical Jawline Contouring using PDO - how does it work?

A well-defined chin and jawline plays a major role in overall facial attractiveness and youthful appearance. But not all of us are blessed with a chiseled jawline; moreover sometimes it's become less defined due to age. Various hormonal changes or with age our skin start losing elasticity and fat can be accumulated under the jawline, causing it to lose shape.

Jawline contouring is a term used to describe a procedure to make the jawline look better. Using Jawline Contouring you can have strong jawlines that are uninterrupted. There are a range of excellent treatments available to have a more visible and sculptured jaw as well as slim face. However if you want non-surgical, minimally invasive **Jawline Contouring** then you must take the benefit of [PDO Threads](#). This is a perfect treatment for correcting loose skin around the neck/jawline or eliminating a double chin.

What are the Benefits?

PDO Jawline Contouring solves the following issues:

- Sagging jowls
- Marionette lines
- Chin wrinkles
- Double chin
- Loose skin under the chin
- Poorly defined jawline

How does PDO Jawline Contouring work?

Non-surgical **PDO jawline contouring** can be achieved with strategic application of PDO threads. **PDO (Polydioxanone) thread lifts** is a safe procedure that can treat sagging, aging skin. [PDO thread lift](#) uses FDA-approved medical-grade sutures that are absorbed in our body over time. Before starting in non-surgical jawline contouring patient has to attend a consultation with one of our experienced doctors who can identify your cosmetic goals and determine whether this is the right treatment to help you achieve them.

During the process, tiny absorbable threads are inserted into the below layer of the skin and around the jawline. These threads have a tightening, lifting effect on the skin. Stimulating the production of collagen, PDO threads causes the skin tissue to contract thereby results a sculpted, contoured jawline. Also it can create a very positive effect upon a person's silhouette and contribute to a smoother, more youthful jaw.

How long does jawline contouring using PDO Threads last?

[PDO thread lift](#) procedures for jawline contouring gives the effect of perfect face lift without surgery for a long time. For some candidate the effects stay for up one to two years, although this depends on the way the threads settle in the body and react to personal anatomy.
