

## Air-cooled water chiller LB-82ACC

Labotronics air-cooled water chiller is a microcomputer-controlled unit with a temperature range of 3–30C. Features refrigerant types of R134A, R22, R407C, R410A, and R404A. The unit offers a capacity of 1316-156245 kcal/h. Equipped with a hermetic scroll-type compressor, which prevents leakage.
