Datasheet: Cloud-FIT | Oracle Cloud SaaS Ops Management Solution

Cloud-FIT It aims to maximize your Oracle Cloud Investments and minimize maintenance costs.

A core feature of Cloud-FIT is the Automated Functional Implementation Tracker (FIT), which prioritizes the most relevant features that truly matter to your business. Using Gen-AI, Cloud-FIT recommends existing features & standard functionalities in your Oracle Fusion application. It optimizes your Oracle Cloud investment by reducing customization needs and minimizing costs for testing, upgrades, and managed services.

Business Benefits with Cloud-FIT

- 80% less effort in release notes analysis
- 40% less effort in impact analysis
- Up to 50% cost savings on managed services

Maximize your Oracle Cloud Investments & minimize maintenance costs with Cloud-FIT, an AI-powered Oracle Cloud SaaS Ops Management Solution. Download **[Cloud-FIT Datasheet](#)** to learn more.
