What are the Key Driver in the industry?

Key Driver: Uninterrupted Power Supply Demand from the Industries for Operational Activities

There are certain sectors where an uninterrupted power supply is required to ensure the smooth functioning of the industry. Hence, to suffice this need, several industries seek diesel generators as standby units. These generators are in high demand in industries like healthcare, oil refineries, and telecommunications due to unforeseeable circumstances such as power outages & blackouts. In the healthcare sector, machines such as ventilators rely on electricity to function, therefore hospitals & nursing homes keep standby diesel generators on hand to avoid disruption. Furthermore, the telecom industries have led to growth in the market for diesel generators, as telecom companies have set up new base stations to ensure better network coverage following the arrival of 5G in 2019.
