

Corn Protein Market is Anticipated to Grow at a CAGR of 6% | Demand, Scope by 2028

The [corn protein market](#) is anticipated to expand from 2021 to 2028 at a **compound annual growth rate** of 6%. The market for maize protein is expected to rise between 2021 and **2028** due to the high demand for natural and plant-based goods.

Zeins, which primarily consist of the prolamin fraction of maize and have a protein level of more than 90%, are the major component of corn protein. The protein from maize is also a significant source of bioactive peptides.

One of the key factors anticipated to drive the market's growth is the rise in customer desire for organic food goods. The increasing need for maize protein in the medical sector, where it is in high demand since it is less dangerous and susceptible to viruses than animal protein, as well as rising disposable incomes among consumers, are also anticipated to fuel the market for corn protein from 2021 to 2028.
