

Vestibular Rehabilitation At Fyzical Plano

Vestibular Rehabilitation is a form of Retraining Balance Therapy. It has emerged over the past several years as an alternative treatment for patients with chronic non-resolved motion intolerance, visual sensitivity, and imbalance problems. At Fyzical Plano We have a comprehensive balance program that includes assessment and evaluation programs, balance retraining, and vestibular rehabilitation.

With balance retraining and [vestibular rehabilitation](#), our goal is to improve balance function and visual motor control, increase general activity levels, and help your body compensate for inner ear disorders.
