

# Robotic Kidney Transplant

Robotic Kidney Transplant successfully performed on a 24-year-old

## **ROBOTIC KIDNEY TRANSPLANT BENEFITS**

- Robotic Kidney Transplant is minimally invasive and requires just a small incision of approximately 5 centimetres
- It results in higher accuracy and precision, faster recovery, less pain, minimal scars, shorter hospital stay, and quick resumption of daily activities

4<sup>th</sup> Generation da Vinci Robotic System

## **THE KAUVERY INSTITUTE OF ROBOTIC SURGERY**

- Offers advanced robotic surgery for General GI procedures, Liver Donor Procedures in Living Donor Liver Transplants, Kidney Transplants and Oncology.
- It is one of the very few centres in Tamil Nadu to provide robotic surgeries in Kidney Transplants.

## **THE SOLUTION- ROBOTIC KIDNEY TRANSPLANT**

- After a thorough evaluation and considering his medical history as well as potential risks - Robotic Kidney Transplant was planned
- Patient's father was found to be suitable donor
