A built-in Bluetooth module supports 12V battery tests by pairing an app with Bluetooth.

- [JS3000](#):

The JumpSurge3000 is a 3000 Peak Amp jumpstarting tool and power bank for vehicles on and off the road. This device supports vehicles with 12V batteries on up to 9L gas engines and 7L Diesel engines. Capable of 45 jump starts on a single charge, the JumpSurge3000 is a robust and powerful tool capable of bringing a battery “back to life” in only 1 second. It's multiple protection systems and fast charging capability keep you ready for anything, no matter where you go or what you drive.

- [GScan Zenith Z5:](#)

Introducing our first automotive diagnostic scan tool in **the Z series**.

In combination with our vast diagnostics software and the world's best industrial tablet, **Z5** will give you diagnostic confidence.

- [Tornado 90000](#):

The Tornado90000 is TOPDON's newest cutting-edge smart charger, made for professional and commercial users. This device is suitable for all types of 12V and 24V lead-acid and lithium batteries, with a wide battery capacity range from 5 to 90 amps.

- [Jaltest V9](#):

Jaltest V9 is the module of Jaltest Diagnostics multi-brand and multi-system diagnostics tool designed to meet the most demanding workshop needs. It enables carrying out the most advanced diagnostics tasks for the **repair and maintenance of commercial vehicles** such as trucks, buses, trailers, light commercial vehicles, and pick-up trucks.

- [BT200](#):

TOPDON's BT200 is an automotive battery tester perfect for new users, with easy plug-and-play operation, and an accurate display of test results. The tests will help users assess whether the battery needs to be replaced.

The tool is suitable for battery testing 12V with up to 2000 Cold Cranking Amps (CCA), cranking testing, and charging testing 12V&24V batteries. It can test Regular Flooded, AGM, GEL, EFB, and VRLA batteries. Test results are based on CCA, DIN, JIS, EN, IEC, GB, SAE, MCA, BCI, and CA Standards.

- [BT300](#):

TOPDON®'s BT300P is our newest **12V** lead-acid vehicle battery tester with a **Built-in Printer**. It can test **100 to 2000 Cold Cranking Amps (CCA)** batteries

- [BT600](#):

BT600 is TOPDON's newest advanced battery tester for 12V vehicles. With a 3.5-inch color screen and a built-in thermal printer, this tool offers the ultimate solution for accurate, fast, and convenient testing. It allows you to easily view the battery's condition and print test reports in real time. The BT600 adopts cutting-edge conductivity testing technology and includes reverse polarity protection to prevent improper connections. This multifunctional tool can measure the actual Cold Cranking Ampere capacity of the car's battery, and its state of health, and quickly analyze the starter and charging systems.

- [TC001:](#)

TOPDON's TC001 is a portable camera that turns your Android smartphone/tablet or Windows laptop into a powerful thermal imager. Simply download the accompanying app, slot the TC001 in your device's USB-C port, and unleash thermal technology that formally only belonged to special forces.

Perfect for home inspectors, HVAC technicians, electricians, automotive technicians, and even farmers looking to protect crops and livestock.

- [TB4000:](#)

The Tornado4000's smart technology matches the power output to the battery's needs for safer repair and minimizes unnecessary energy consumption. With this, you can improve the performance and longevity of your batteries. With intelligent microprocessors, this product will charge two times faster than standard chargers, so you can offer timely and efficient services.

- [TB8000:](#)
