

How Much Does It Cost To Make A Crypto Wallet App?

It is difficult to give a specific cost for building a crypto wallet app, as the cost will depend on a number of factors such as the features and functionality you want to include, the complexity of the app, and the hourly rate of the developers you hire.

In general, building a simple crypto wallet app with basic features could cost around \$10,000 - \$50,000, while a more complex app with advanced features could cost upwards of \$100,000 or more. It's best to consult with a [crypto wallet app](#) company to get a more accurate estimate for your specific project.

It's also worth noting that building a crypto wallet app involves more than just writing code. You will also need to consider other costs such as hosting, design, testing, and ongoing maintenance.
