

Quartz Heaters: Efficient Electric Immersible Heater Solutions

Process Technology's quartz heaters are designed for use in aggressive chemistries, such as aqueous acidic plating solutions and pickling tanks. Featuring a heavy-wall metal element encased in a quartz sheath, these electric immersion heaters guarantees optimal performance and durability. Available in single-phase configurations ranging from 500 to 10,000 watts and 120 to 600 volts, they offer versatile solutions for various industrial applications.

QUARTZ HEATERS:

EFFICIENT ELECTRIC IMMERSIBLE HEATER SOLUTIONS

Process Technology's quartz immersion heaters offer durable, efficient heating for aggressive chemistries, guarantees reliable performance in industrial applications.

OUR SERVICE:

- ✓ Chemical Compatibility
- ✓ Versatile Configurations
- ✓ Optimal Performance
