

# Databricks Migration Services | Databricks Partner - Jade Global

The future of data analytics is with Databricks, and your fastest way to get there is Jade Global's Migration Accelerator.

Legacy warehouses are underprepared for the explosive data growth that's going on for your business. Difficulties in processing unstructured data, lack of advanced analytics, and poor integration with other systems lead to increased costs and extended project timelines.

Leave behind all these limitations of legacy warehouses by migrating to Databricks, the world's first data intelligence platform powered by generative AI.

If you have uncertainties regarding the time and cost involved in the migration, then Jade Global has the solution. Leverage our Migration Accelerator that drives 30% faster migration with up to 40% lower TCO.
