[Cosmetic Product manufacturers](#) keep on working on their product design, productivity capabilities, serving and manufacturing processes, packaging, shipping, etc to serve this area with perfection and excellence.

[Third-Party Cosmetic Manufacturers](#) have proven to be the best assistance to these cosmetic product manufacturers. They provide end-to-end solutions ranging from product designing to manufacturing. They shoulder the responsibility of their associates and provide them with the best processing through every step. The companies generally outsource their manufacturing processes due to increased regulations, manufacturing, infrastructural hassles and technological advancement to be carried out throughout the process. Meeting the demand of the time along with

the demand of the clients looks faded if one is not well versed with these requirements whereas CDMO has proven to be the best in all situations.

Salicylic Acid

Salicylic acid is listed as a preservative whose usage is restricted to some specific quantity as per the variation of products. It is used to hinder the development of microorganisms. It is clearly stated that in case it is not used as a preservative then its function should be clear from the presentation of the product. It is advised not to use salicylic acid for children under the age of three years. Many surveys and studies conducted whereas final decisions are stated as:

- Salicylic acid can be used as a preservative in cosmetics products and can be considered safe if used up to 0.5%.
- The same product can be considered safe when used at a concentration of up to 3 percent for cosmetic rinse-off hair products and up to 2 percent for other products.

Keeping a balance and accurate measures while preparing cosmetic products is quite mandatory as little imbalance can hamper the productivity and launch of the product in the market as per the specified standards.
