

What is the Lifespan of a Rottweiler? Can we Increase its Lifespan?

The Rottweiler is a breed of domestic dog that originated in Germany. Its origins can be traced back to the Roman Empire, where it was used as a herding and guarding dog. Known for its strength and loyalty, the Rottweiler has become a popular breed around the world. On average, a rottweiler dog is expected to live between 8 to 10 years. We can even say that a rottweiler's life is shorter than other dog breeds of comparable size and weight.

If you have a female rottweiler as a pet, she is expected to live longer than a male. A female rottweiler can live two years more than a male rottweiler. Are you looking to bring a rottweiler dog to your home? Then, you may want to have a female dog who will live around 8 to 12 years.
