

Meta Warns Its Latest Large Language Model ‘May Not Be Suitable’ for Non-English Use

Meta is back with a new large language model (LLM) — Llama 2, which was released via a [research paper published](#) in July 2023. Llama 2 is the successor to Llama 1, which Meta [introduced in February 2023](#).

In a move that Yann LeCun, VP and Chief AI Scientist at [Meta](#), described as “huge” in a [July 18 tweet](#), the tech giant has chosen to make Llama 2 both open source *and* available for free for research and commercial use. Users will therefore be able to start building on Llama 2.
