

Csmart for Private 5G: Unlocking the Potential of Enterprise Networks

In an era where 5G technology promises unprecedented connectivity, Private 5G networks emerge as a quick, feasible, and direct solution for enterprises to harness its transformative capabilities. With global 5G deployment rates skyrocketing, traditional CSPs and telcos might struggle to meet the burgeoning demands of 5G-driven businesses in time. Here lies the importance of private networks, allowing enterprises to swiftly leverage 5G technology and its associated capabilities.

How Csmart Addresses Private 5G

Through our cutting-edge Csmart suite platform, we facilitate the seamless release of private network monetization, catering to the specific needs of businesses.

Private networks offer enterprises guaranteed coverage, network control, superior performance, heightened security, and innovative monetization models. Csmart Business solution for Private 5G revolves around replacing legacy, hardware-centric networks with a cloud-native, easily deployable digital product - Csmart. By accelerating digitalization, Csmart empowers private network solutions, ensuring they function seamlessly for both operators and enterprises.

Private 5G deployment for services/offerings monetization

With faster 5G deployment rates across the world, CSPs or telcos may not be able to deliver 5G business demands in time. As a result, implementation and maintenance of private

networks will be crucial for enterprises who want to quickly leverage 5G technology & its resulting capabilities to meet growing market demands.

Covalensedigital with a strong cloud & software background can enable end-to-end private 5G network monetization for enterprises across various industry verticals.

Csmart suite platform for releasing private network monetization

The key drivers for enterprises to explore private networks are guaranteed coverage, network control, performance, security, and innovative monetization service model's support. Private network solution provides MVNx operators with new revenue generating opportunities for public & private enterprises.

Covalensedigital can facilitate this by replacing legacy, hardware-centric networks with cloud native, easy to deploy digital product – Csmart. With quick digitalization, Csmart can enable private network solutions to effectively work for operators and enterprises.

Key Features and Benefits

Network Slicing Capabilities

Tailor your network to suit various enterprise needs through efficient network slicing, optimizing resources and ensuring a consistent user experience.

5G SA and NSA Compatibility

Csmart seamlessly integrates with both Standalone (SA) and Non-Standalone (NSA) 5G modes, providing businesses with the flexibility to choose the best fit for their requirements.

Win-Win Scenarios

Operators and enterprises can share revenue by deploying additional capacities for HD video consumers, paving the way for mutually beneficial partnerships.

Enhanced CRM

Private 5G networks provide comprehensive remote diagnostics, inspection, and maintenance capabilities across various industry segments, improving data quality through our efficient Csmart mobile app.

Monetization Opportunities

By offering private and dedicated networks for manufacturing, production, supply chains, and various business sectors like sports arenas, hospitals, conventional centres, railways, and many other business sectors., both operators and enterprises unlock new avenues for revenue generation.

Unlocking Business Benefits

Innovative Services

Leverage the low-latency capabilities of private 5G to introduce innovative services like augmented reality (AR), virtual reality (VR), and IoT applications. These new offerings create additional revenue streams for your enterprise.

Enhanced Operational Efficiency

The integration of Csmart enhances overall operational efficiency, reducing downtime and improving network reliability. This leads to uninterrupted business processes and increased

productivity.

Competitive Edge

Stay ahead of the competition by providing enhanced, low-latency services powered by private 5G. This positions your enterprise as a market leader, attracting new customers and retaining existing ones.

Scalable Solutions

Csmart's modular design allows for easy scalability, accommodating the growing needs of enterprises as they expand.

Data Security

Csmart's robust security measures safeguard sensitive data, maintaining customer trust and ensuring compliance with data protection regulations.

Future-Ready Infrastructure

As your enterprise evolves, Csmart's scalable architecture and support for emerging technologies ensure that your private 5G network remains at the forefront of innovation.
