

# Gamma- a high quality feed for Whiteleg shrimp

## GAMMA Success Stories

Gamma is a high quality feed range, designed for Whiteleg shrimp.

Advantages:-

1. Better digestibility of feed eaten
2. Reduced size variation
3. Good growth of shrimps
4. Water quality maintenance
5. Better FCR

Our customers are very happy with the performance of Gamma feed, as they are getting good results with this feed at their farms. Happy to share a few results with all.

# GAMMA

**Gamma is a high quality feed range,  
designed for Whiteleg shrimp.**

## Features:-

1. Higher digestible protein content.
2. Available in 8 sizes, including mini-pellets, adapted to the different life stages.
3. Feed formulated based on the nutritional profile and digestibility of each ingredient.
4. Attractability and palatability of the ingredients.
5. Special attention is given to the different phases of feed processing.

## Benefits:-

1. This complete diet meets all the nutritional requirement of the Whiteleg Shrimp.
2. 8 different pellet sizes eliminates the possibility of size variation.
3. Consistent quality, low feed intake, hence low Feed Consumption Ratio (FCR).
4. Stimulates the feed intake, thus allowing the shrimp to reach its full growth potential.
5. Achieves excellent water stability.

## Nutrition Facts:-

Feed code	Feed form	Package (kg/bag)	Crude Protein (% min.)	Crude Fat (% min.)	Ash (% max.)	Fiber (% max.)	Moisture (% max.)
Gamma 1	Crumble 18-25 mesh	2 bags x 5kg	38	5	14	3	10
Gamma 2	Pellet 1.0x1.5-2 mm	10	38	5	14	3	10
Gamma 3	Pellet 1.2x1.5-2 mm	20	38	5	14	3	10
Gamma 4	Pellet 1.4x2-4 mm	20	38	5	14	3	10
Gamma 5	Pellet 1.6x2-4 mm	20	36	5	15	3	10
Gamma 6	Pellet 1.8x2-4 mm	20	36	5	15	3	10
Gamma 7	Pellet 1.8x3-5 mm	20	36	5	15	3	10
Gamma 8	Pellet 2x3-5 mm	20	36	5	15	3	10
