Key Skills You need to become a Java Full Stack Developer in 2025

I am talking about problem-solving skills. People with this skill can assess your problems and give you multiple solutions to solve that problem. People with this skill usually play a major role in developing the world through their revolutionary methods and ways of solving complex problems.

Let me ask you this? What do you think companies would prefer?

1. An employee who informs them about problems

Or

2. An employee who solves all their problems

What has all this got to do with full-stack development?
