

# Do you want to download Telegram files? (The best way)

To download from Telegram with a direct link, we need third-party tools. Most of these tools are either broken or not free.

You can find Telegram bots or browser extensions that let you download from Telegram. Just search for them, and you can save directly to your gallery. Some of these tools rank high on Google, Bing, and Yahoo. Unfortunately, they are not functioning properly.

We launched a free online [Telegram downloader](https://telegramdownloader.net) tool on the telegramdownloader.net website. You can download all kinds of Telegram files. You can convert videos, files and documents, audio files, movies and series, ZIP and RAR files, etc. to a direct link and download them.

Our tool is free and will stay that way. To keep it available, please share your comments and suggestions. This helps us improve and ensures user satisfaction.

To use the Telegram downloader tool, log in to the website. Then, copy the Telegram file link. Next, paste it into the downloader box. Finally, wait for your download link to be created.

Try it : <https://telegramdownloader.net/>
