PCD is a terminology used in the pharma business which stands for Propaganda Cum Distribution. This field of pharmacy has a bright future ahead and is being taken up by most business owners due to the remunerative benefits accessible. There are immense [benefits of PCD franchise Business for the Indian Pharmaceutical Market](#) which are elucidated in the upcoming paragraphs.

## Advantages of PCD Franchise Business to the Indian Pharmaceutical Market

The Indian Pharma Industry is showcasing its skills by inventing the latest and most effective medicines for fatal diseases. Most of the drugs during COVID-19 were exported in the surplus from India to meet the global demand and save the lives of the patients. A plethora of medicines are manufactured and supplied by PCD companies which have established themselves as supreme and credible pharma boosters. Below given are the most preeminent benefits of PCD franchise Business for the Indian Pharmaceutical Market.

- **Increase in Gross Domestic Product**– Gross domestic product is the standard measurement of total goods and services produced within the national borders of the country annually. The pharma sectors now contribute to around 2% of the total Indian GDP. With more ventures and companies established as a PCD pharma businesses, there will be an increment in the Gross Domestic Product of India eventually.
- **Raise in Employment Rates**– Most of the rural population of India prefers working in the manufacturing sectors of companies. After the Covid 19 crisis, ample people are unemployed and striving to search for jobs. The establishment of PCD companies will also raise the employment rate in India. Jobs in manufacturing units and the distribution of products will decrease unemployment rates in the country.
- **Budget-Friendly Business**– To steer innovation in the pharma sector, the Indian government replenished its confidence in the private pharma sector's skills and excellence. Every year Indian parliament passes an annual budget for the pharma and healthcare sector. This budget is allocated with reference to the increasing long-term

demands of the pharma Industry. As PCD business is a low investment business, less sums of money are spent on its uplifting making it a budget-friendly business.

- ***Increase in Pharmaceutical Exports***– The pharmaceutical market in India has expanded in all aspects and formed a way for international medicine exports as well. Due to the self-sufficiency of the Indian pharma sector, exports are a way pf increasing business benefits to pharma company and owners. With more and more pharma businesses, India will compete with the largest economies of the world and will occupy its position in this list.
