

# Comprehensive Dry Eye Treatment Jacksonville, FL: Florida Eye Specialists

Dry eye affects many people worldwide, with symptoms like insufficient tear production or low tear quality causing discomfort and possible harm to the eye's surface. This problem has the potential to impact individuals of all ages and genders, with a higher prevalence seen in women. If you are feeling the signs of dry eye, like a gritty or burning feeling, blurry sight, or too much tearing, Florida Eye Specialists in Jacksonville, FL, can offer the thorough treatment you require. Our specialized Dry Eye Center is devoted to diagnosing and treating this condition with the highest level of skill.

## Comprehending Dry Eye Syndrome

Dry eye happens when the eyes do not make sufficient tears or when the tears evaporate too fast because they are not the right consistency. This may result in various symptoms such as irritation, discomfort, and potential vision issues. Various elements play a role in causing dry eye, such as environmental factors, extended screen usage, specific drugs, and existing health issues. Hormonal fluctuations, especially in females, also have a major impact on the onset of dry eye. Dealing with these factors necessitates a comprehensive strategy, which is precisely what our Dry Eye Center provides.

## Dry Eye treatment

Florida Eye Specialists is pleased to run the top Dry Eye Center in Jacksonville, FL, situated at our San Marco and Ponte Vedra sites. Dr. Kimberly Riordan, a well-known expert in treating dry eye, leads our facility. Dr. Riordan and her team are committed to offering a wide variety of

services, starting from the first diagnosis to advanced treatment options customized to meet the specific requirements of each patient.

Being the sole Dry Eye Center of Excellence in this region, we employ advanced technology for precise diagnosis and successful treatment. Our method involves a comprehensive assessment of your tear production and the quality of tear film.
