

# Best Practices For Creating Accessible Websites

# BEST PRACTICES FOR CREATING ACCESSIBLE WEBSITES

1

## DESCRIPTIVE LINKS

Instead of using generic phrases like "click here" or "read more," make your hyperlinks descriptive.

## ACCESSIBLE FORMS

Design forms with accessibility in mind by providing clear instructions, using proper field labels, and enabling error identification and correction.

2

## ALT TEXT FOR IMAGES

Alt text serves as a substitute for images and is essential for users who rely on screen readers.

3

## RESPONSIVE DESIGN

Responsive design not only improves user experience but also benefits users. Hire experts offering **website development services in Chandigarh** to make your website responsive.

Creating accessible websites involves using semantic HTML, descriptive links, alt text for images, keyboard accessibility, color contrast, responsive design, clear navigation, accessible forms, media players, and regular audits to ensure inclusivity for users of all abilities.
