

Masters in Accounting with Analytics Track

Your Fast-Track Journey to an Accounting Career in the US!

Miles has unlocked a unique pathway for Indian accountants, offering them opportunities to work in the US, just like techies have. We've collaborated with leading US universities and converted their accounting programs to STEM by integrating Business Analytics. This ensures that Indian accountants are eligible for the same 3-year work in the US on their student F1 visa (followed by an additional 6 years if they get their H1B visa).
