

# Future-Ready BSS/OSS for B2B Telcos & 5G Services

## Enterprise Services

In today's fast-evolving digital landscape, enterprises need agile and integrated solutions to drive growth and efficiency. At Covalensedigital (CDS), we provide cutting-edge Enterprise Services that harness the power of leading technologies like the Oracle Communication Stack and the ServiceNow platform. Our comprehensive approach ensures seamless operations, optimized performance, and exceptional user experiences.

## What Partnering with Covalensedigital Brings You Oracle Communication Solutions

- End-to-end telecom solutions that enhance operational efficiency and scalability.

## ServiceNow Implementations

- Transform IT service management, operations, and customer service with streamlined workflows.

## Customized Digital Solutions

- Bespoke services that align with your enterprise's specific needs, ensuring maximum ROI.

## Service Offerings

### Oracle Communication Stack

Covalensedigital partners with Oracle to provide a comprehensive BSS/OSS Solution-in-a-Box tailored for the telecom sector. Our offerings, including 5G-IoT and MVNx market solutions,

drive efficiency, scalability, and innovation. With industry-leading expertise, we help telecom businesses revolutionize their operations and achieve measurable business outcomes, such as significant cost savings and improved market share.

### **ServiceNow**

ServiceNow is a leading cloud-based platform that helps businesses streamline and automate their digital workflows across various functions such as IT service management (ITSM), human resources, customer service, security, and more. The platform empowers organizations to improve efficiency, boost productivity, and deliver better customer and employee experiences by unifying workflows and automating routine tasks.

ServiceNow is trusted by over **7,700 enterprise customers and 50 million users** globally, including more than **80% of Fortune 500 companies**.

Discover pre-integrated BSS/OSS and enterprise BSS platforms for 5G services, designed to empower B2B telcos with a SaaS solution.
