

Vitalis 2.5- Innovative feed solution for shrimp broodstock

Vitalis 2.5- Innovative feed solution for shrimp broodstock

Shrimp broodstock nutrition and biosecurity are well known for being essential parameters in successful shrimp hatchery propagation. Vitalis 2.5 is a cold extruded dry pelleted feed that has been developed to partially replace the use of moist feeds while at the same time providing the correct level of essential nutrients in a stable form. The formula is based on a high level of marine protein components, Algae, Omega 3 fatty acids (DHA/ EPA), Vitamins and Minerals. Vitalis 2.5 helps in delivering high nauplii production, reduces risk of diseases and maintains water quality. [Skretting Marine Hatchery Feeds](#)
