

## External Defibrillator Monophasic

Zimed external defibrillator provides energy settings from 0 to 360 J, with  $< \pm 1\%$  accuracy and an 8-second charge time at 360 J. It features monophasic defibrillation, manual operation with external reusable and integrated pediatric paddles, and is powered by an internal NiMH battery. Standard parameters include ECG, NIBP, temperature, respiration, SpO<sub>2</sub>, and pulse.
