

What Causes an Enlarged Uterus and Your Next Steps

Curious about [what causes an enlarged uterus](#)? At USA Fibroid Centers, we specialize in diagnosing and treating conditions like uterine fibroids, one of the leading causes of an enlarged uterus. Fibroids are non-cancerous growths that can cause heavy periods, bloating, and discomfort. If left untreated, they can lead to complications like anemia and reproductive issues.

Our expert team offers Uterine Fibroid Embolization (UFE), a non-surgical procedure that shrinks fibroids and restores your uterine health. With a personalized approach, we help women regain control of their lives, free from fibroid symptoms. Don't let an enlarged uterus affect your daily activities.

Take the first step towards relief and schedule a consultation with our specialists today!
