

Yggdrasil To Launch New Slot 4 Fantastic Fish Block In Partnership With Player 4

In partnership with 4ThePlayer, Igdrasil has expanded both the scale of its business and the size of its symbols in the latest release, 4 Fantastic Fish GigaBlox.

Thrilling features and popular mechanics:

This fantastic slot release offers 46.656 different ways to win. It's part of a popular series developed by Fother Player. The maximum winning potential is up to 12.000x, thanks to the incredible features that make gameplay even more thrilling. Among the features are Money Ways, Fishing Breathing, and four giant squid modifiers, as well as the popular GEM (GigaBlox Game Engagement Mechanic).

Each fish sign landing on a reel has a cash value, and once you form a winning pay line, that value is added to the final prize. The cash prize is between 0.1 and 50 times the bet, and the Money Ways mechanic increases the value of the multiplier and further increases the chance of winning.

Once a big-game fish the size of Gigablocks settles on a reel and becomes part of a fish symbol, you're guaranteed a win. The big fish can cover 2x2 reels and deliver up to 100x betting wins. When Superfish appears, it covers 3x3 reels and guarantees a win for megafishes with 450x and 4x4 size and value up to 3,000x. There's also UltraFish, which is 5x5 size and rewards players with up to 10.000x huge multipliers.

When three or more Respins land on the reel, the fishing Respin Bonus is activated. Thanks to the classic hold and win mechanics that are already popular. Unlock the new reel and reset the spin counter to zero for each new Scatter symbol landing on the reel.

During each rotation, four special giant squid features are activated, and the seaweed symbol has the potential to help reveal the winning symbol. It also leads to the emergence of the Gigablocks symbol, which is 5x5 in size. Once landed, the icons change their positions to form a victory.

Powered by GATI:

The game is one of Igdrasil's launch products based on GATI, the company's famous technology that allows partners to access customized and pre-configured content, as well as a fantastic development toolkit that enables seamless integration and rapid deployment of thrilling games.

Mark McGinley, Igdrasil's chief gaming officer, said, "4 Fantastic Fish GigaBlox adopts the game's classic fishing genre and develops it into an exciting and bold take with fascinating features and mechanisms such as Fishing Respins and Giant Squid modifiers. Adding the power of the GEM to bring a new twist to the reel set will result in every spin delivering unique results, and players expect up to 12,000x victory."

Henry McLean, Fother Player's co-founder and commercial and marketing director, said, "Players continue to enjoy our four Fantastic Fish series, and now we're adding the popular Gigablocks mechanic to promise a truly colossal victory! This iteration of our incredible franchise has the greatest potential ever!" [바다이야기](#)
