

# Learn What Causes an Enlarged Uterus and Reclaim Your Comfort

Are you wondering [what causes an enlarged uterus](#)? At USA Fibroid Centers, we specialize in diagnosing and treating this condition, commonly linked to fibroids, adenomyosis, and other uterine disorders. An enlarged uterus can lead to symptoms like heavy periods, bloating, pelvic pain, and frequent urination, disrupting your daily life. Our expert team offers non-surgical solutions, including Uterine Fibroid Embolization (UFE), to shrink fibroids and alleviate symptoms.

Don't let the discomfort take control of your life. With our compassionate care and advanced treatments, you can regain your comfort and well-being. Visit one of our many nationwide centers to get a customized treatment plan and address what causes an enlarged uterus today!
