

Leather Watch Strap Parts Name Guide

Why We Need to Know Watch Strap Parts Name ?

When you buy a watch strap, are you curious about what some professional watch strap parts name mean?

As a dedicated custom watch straps brand, Dayday watch band has always focused on crafting high-quality leather straps by hand.

This blog aims to help watch enthusiasts better understand the different watch strap parts names and their unique features.

Additionally, we'll explain how Daydaywatchband can customize each components of a watch strap to your specific preferences.

Watch Strap Parts Name

1. **Case Body** : The case body is the main component of the watch that houses the movement and dial. It is the central piece to which the watch strap is attached.
- 2.
3. **Strap Attaching Portion/Lug on a Watch** : The strap attaching portion also called lug on a watch is where the watch strap connects to the watch case, usually through spring bars or screws. Custom options include varying lug widths to fit different watch models and designs for a seamless look.
- 4.
5. **Watch Crown** : The watch crown is the small knob on the side of the watch case used to set the time and date. While not part of the strap, it's crucial for the overall aesthetic.
- 6.
7. **Case Back** : The case back is the rear part of the watch case, which can be solid or transparent to display the movement. A well-crafted strap will sit flush against the case back, enhancing the watch's overall comfort and appearance.
- 8.
9. **Watch Buckle** : The watch buckle secures the strap around the wrist. It can come in various designs, such as pin buckles, deployant clasps, or butterfly clasps. [Custom watch straps](#) from Daydaywatchband can be made from different buckle end design to match different watch buckle.

10.

11. **Buckle Adjustment Holes** : Buckle adjustment holes are the perforations on the strap that allow for size adjustments. **Watch band customization can include the number of holes, their spacing, and reinforcement to prevent stretching and wear.**

12.

13. **Fixed Loop / Free Loop** : The fixed loop and free loop are the small bands that hold the tail end of the strap in place. The fixed loop is sewn into the strap, while the free loop moves freely. If you don't like this part, we can remove it .

14.

15. **Stitching** : Stitching refers to the thread that holds the pieces of the strap together. Custom options include different stitching patterns, thread colors.

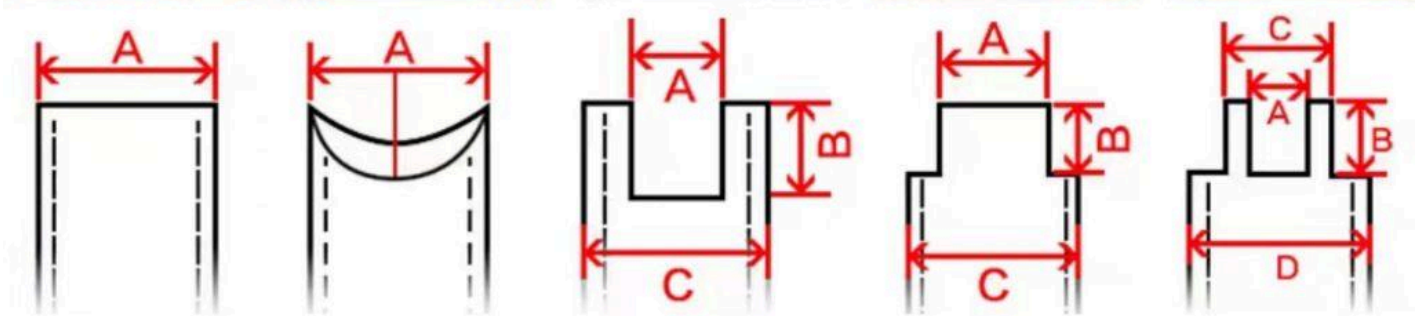

16.

17. **Lining of Leather Watch Strap** : The lining is the underside of the leather strap that touches the skin. We usually use the High-quality linings, like Italian water-resistant calfskin, provide comfort, durability, and moisture resistance. Besides, custom linings can be chosen based on desired material, and color.

At Daydaywatchband, our custom straps are meticulously designed to match the original attachment profiles of the brands we cater to. Whether you have a [Rolex](#), Omega, Cartier, or any other luxury watch, our straps are engineered to provide a perfect fit, maintaining the integrity and aesthetics of your timepiece.

Watch Strap Tail Ends

Equally important is the design of the strap tail end. This section includes an image illustrating the different shapes and finishes of watch strap tails. The tail end can be straight, rounded, tapered, or feature a distinctive cut, depending on the brand and model.

Ogive

Curved

Square with
rounded angles

Semi-squared

Our custom watch straps at Daydaywatchband are designed to replicate these original tail end profiles. This ensures that your watch not only looks authentic but also offers the same level of comfort and functionality as the original strap.

Type of Strap Edge Banding

Burnished Edges

Edges are colored and polished to make them smooth and shiny. This is common in most leather watch straps, sealed edges for long-term durability.

Folded Edges

The leather edges are folded, making them rounded and durable. This method is often used for luxury watches to increase comfort elegance and durability.

Matching Original Strap Designs

The beauty of a luxury watch lies in its details, and the strap is no exception. Different brands and series have their unique strap designs, including the placement and style of buckle holes. Daydaywatchband excels in replicating these original designs. By matching the strap attachment points and tail ends to the original specifications, we ensure that our straps provide the same high standards of comfort, style, and durability.
