

5G is An EM Biological Weapon Systems at 60Ghz that Runs 3,600,000,000,000 Cycles Per Minute

5G is An EM Biological Weapon Systems at 60Ghz that Runs 3,600,000,000,000 Cycles Per Minute of Pulsating Electromagnetic Frequencies and non-ionizing Radiation.

It can heat up air molecules by causing them to oscillate, and the 5G weapon system achieves this effect through the use of sympathetic harmonics.

“The day science begins to study non-physical phenomena, it will make more progress in one decade than in all the previous centuries of its existence.”

— Nikola Tesla

"you must consider the whole part played by electricity in Nature... Human beings cannot go on developing in the same way in an atmosphere permeated on all sides by electric currents and radiations. It has an influence on the whole development of man... This life of men in the midst of electricity, notably radiant electricity, will presently affect them in such a way that they will no longer be able to understand the news which they get so rapidly. The effect is to damp down the intelligence. Such effects are already seen today. Even today you will notice how people understand the things that come to them with far greater difficulty than they did a few decades ago"- Rudolf Steiner, 1924.

EM Biological Warfare, Radionics, Psychotronic Warfare, Psychoenergetics Warfare and we are aware of the Deep State Threat and the Perversion of Living Energy Being Held Hostage.

The USA is currently leading the way on 5G. At the June 2016 press conference where the Federal

Communications Commission's (FCC) head Tom Wheeler announced the opening up of low, mid and high

spectrum's. There was no mention of health effects whatsoever. But the dangers are real.

Thousands of studies link low-level wireless radio frequency radiation exposures to a long list of adverse biological effects, including:

DNA single and double strand breaks

oxidative damage

disruption of cell metabolism

increased blood brain barrier permeability

melatonin reduction

disruption to brain glucose metabolism

generation of stress proteins

Let's not also forget that in 2011 the World Health

Organization (WHO) classified radio frequency radiation as a possible 2B carcinogen.

More recently the \$25 million National Toxicology Program concluded that radio frequency radiation of the

type currently used by cell phones can cause cancer.

But where does 5G fit into all this? Given that 5G is set to utilize frequencies above and below existing

frequency bands 5G sits in the middle of all this. But the tendency (it varies from country to country) is for 5G

to utilize the higher frequency bands. Which brings it's own particular concerns. Here is my review of the studies done to date – 11 reasons to be concerned.

#1 – A DENSER SOUP OF ELECTROSMOG

We're going to be bombarded by really high frequencies at low, short-range intensities creating a yet more complicated denser soup of electro-smog

#2 – EFFECTS ON THE SKIN

The biggest concern is how these new wavelengths will affect the skin. The human body has between two million to four million sweat ducts. Dr. Ben-Ishai of Hebrew University, Israel explains that our sweat ducts act like "an array of helical antennas when exposed to these wavelengths," meaning that we become more conductive. A recent New York study which experimented with 60GHz waves stated that "the analyses of penetration depth show that more than 90% of the transmitted power is absorbed in the epidermis and dermis layer."

The effects of MMWs as studied by Dr. Yael Stein of Hebrew University is said to also cause humans physical pain as our nociceptors flare up in recognition of the wave as a damaging stimuli. So we're looking at possibilities of many skin diseases and cancer as well as physical pain to our skin.

#3 – EFFECTS ON THE EYES

A 1994 study found that low level millimeter microwave radiation produced lens opacity in rats,

which is linked to the production of cataracts.

An experiment conducted by the Medical Research Institute of Kanazawa Medical University found that 60GHz “millimeter-wave antennas can cause thermal injuries of varying types of levels. The thermal Effects induced by millimeter waves can apparently penetrate below the surface of the eye.”

A 2003 Chinese study has also found damage to the lens epithelial cells of rabbits after 8 hours of exposure to microwave radiation and a 2009 study conducted by the College of Physicians and Surgeons in Pakistan conclude that EMFs emitted by a mobile phone cause derangement of chicken embryo retinal differentiation.

#4 – EFFECTS ON THE HEART

A 1992 Russian study found that frequencies in the range 53-78GHz (that which 5G proposes to use) impacted the heart rate variability (an indicator of stress) in rats. Another Russian study on frogs who’s skin was exposed to MMWs found heart rate changes (arrhythmias).

#5 – IMMUNE SYSTEM EFFECTS

A 2002 Russian study examined the effects of 42HGz microwave radiation exposure on the blood of healthy mice. It was concluded that “the whole-body exposure of healthy mice to low-intensity EHF EMR has a profound effect on the indices of nonspecific immunity”.

#6 – EFFECTS ON CELL GROWTH RATES

A 2016 Armenian study observed MMWs at low intensity, mirroring the future environment brought about by 5G. Their study conducted on E-coli and other bacteria stated that the waves had depressed their growth as well as “changing properties and activity” of the cells. The concern is that it would do the same to human cells.

#7 – EFFECTS ON BACTERIA RESISTANCE

The very same Armenian study also suggested that MMWs effects are mainly on water, cell plasma membrane and genome too. They had found that MMW’s interaction with bacteria altered their sensitivity to “different biologically active chemicals, including antibiotics.” More specifically, the combination of MMW and antibiotics showed that it may be leading to antibiotic resistance in bacteria. This groundbreaking finding could have a magnum effect on the health of human beings as the bandwidth is rolled out nationwide. The concern is that we develop a lower resistance to bacteria as our cells become more vulnerable – and we become more vulnerable.

#8 – EFFECTS ON PLANT HEALTH

One of the features of 5G is that the MMW is particularly susceptible to being absorbed by plants and rain. Humans and animals alike consume plants as a food source. The effects MMW has on plants could leave us with food that's not safe to consume.

Think GMOs on steroids. The water that falls from the sky onto these plants will also be irradiated. A 2010 study on aspen seedlings showed that the exposure to radio frequencies led to the leaves showing necrosis symptoms.

Another Armenian study found that MMWs of low intensity “invoke(s) peroxidase isoenzyme spectrum changes of wheat shoots.” Peroxidase is a stress protein existing in plants. Indications are that 5G will be particularly harmful to plants – perhaps more so than to humans.

#9 – EFFECTS ON THE ATMOSPHERE AND DEPLETION OF FOSSIL FUELS

Implementation of the 5G global wireless network requires the launching of rockets to deploy satellites for 5G. These satellites have a short lifespan which would require a lot more deployment than what we're currently seeing. A new type of hydrocarbon rocket engine expected to power a fleet of suborbital rockets would emit black carbon which “could cause potentially significant changes in the global atmospheric circulation and distributions of ozone and temperature” according to a 2010 Californian study.

Solid state rocket exhaust contains chlorine which also destroys the ozone.

The effects on the ozone are thought to be worse than current day CFC exposure.

Google's Project Loon is said to bring Internet to rural and hard-to-access areas by using helium balloons.

But these balloons only have a 10-month lifespan. We're looking at a lot of helium being used here, more than what we can possibly have on Earth?

#10 – DISRUPTION OF THE NATURAL ECOSYSTEM

Since the year 2000, there have been reports of birds abandoning their nests as well as health issues like “plumage deterioration, locomotion problems, reduced survivorship and death,” says researcher Alfonso Balmori. Bird species that are affected by these low levels, non-ionizing microwave radiation are the House Sparrows, Rock Doves, White Storks, Collared Doves and Magpies, among others.

But it's not just the birds. The declining bee population is also said to be linked to this non-

ionizing EMF radiation. It reduces the egg-laying abilities of the queen leading to a decline in colony strength.

"In quantum mechanics, electric charge is conceived as being created by the sub-quantum emission and absorption of virtual photons. E.G. by extinguishing the virtual photons on an electron, the electron loses its charge, being converted to a neutrino and moving away through matter or anything else at the speed of light with essentially zero probability of interaction.

For an electron locked in orbit by integral DeBroglie waves (Bohr theory, which is sufficient here), its charge cannot normally be extinguished, but an electron in a current flowing along a wire is not so protected and it can therefore be extinguished. I.e., currents in electromagnetic circuits -- automobile systems, radars, radios, lasers, satellites, human nervous systems, etc. - - can be interfered with or even extinguished by this means. (As has been amply demonstrated by Flying Saucers over the years. RHC)

"The effect can be modulated upon electromagnetic carriers, but in an unusual sense. I.e., this type of modulation is virtual state, so it does not simply gate photons as does normal electromagnetic modulation (AM) or change frequency of the photons produced (FM) -- rather it is modulated onto each individual photon itself, in its unseparated ΔT portion (a photon is comprised of action, $\Delta E\Delta T$ without any separation).

"The virtual state may be thought of as nested shells of physical reality contained or enfolded inside the element of time contained in each quantum of action. It is thus contained in, and carried by, the photon."

Mind over matter is a Hyperfield over an Electromagnetic Field and this is the basis of Spiritual Healing or Absent treatment, with the mind or augmented by a Radionic broadcast treatment instrument.

The point is "there exist more fundamental component fields than electromagnetic fields, and these 'hyperfields' produce electromagnetic field itself. These hyperfields can also just as easily extinguish electromagnetic fields or virtual photons."

The dematerialization of a human form in a seance room -- or of a Flying Saucer in our atmosphere, are good examples of the "extinguishing" of electromagnetic fields -- also the regression of a cancer tumor!
