

Building Pickler: Comprehensive Mobile App for the Pickleball Community

Smartphones and high internet speed have penetrated our lives at a phenomenal level. From handling a grocery haul to watching your favorite OTT series and attending classes to playing your favorite sport on the field with your favorite team of players, our lifestyle is influenced by mobile devices. Today, businesses harness mobile app development services to engage their audiences with exclusive apps. Powered with the most advanced technologies and frameworks, Softqubes has built a revolutionary mobile app for a vibrant sports community in USA.

This blog explains the entire process and our key deliverables, which transformed the pickleball game experience into absolute fun and delight, all within a comprehensive app.

About The Project

Our client hired Softqube Technologies to create a versatile gaming app for a thriving sports community that loved playing pickleball. They wanted a centralized hub for players to access diverse features and customized services. The app should cater to various needs of players of different levels, such as casual players, competitive players, and coaches. Overall, the app should cover the needs of the entire pickleball sports community.

Casual players wanted to play friendly matches, while competitive players looked forward to tournaments, and coaches were enthusiastic about sharing their expertise. By hiring Softqube's mobile app developers, our client got an innovative and comprehensive mobile app that improved the entire on-field gaming experience for all types of players.

Let us find out how did we do this.

Our Key Deliverables For the Project

Our team of talented and highly qualified mobile app developers has used the most advanced technologies and frameworks to develop a unique platform for Pickleball community players. With the best business acumen and proficiency, we have delivered world-class mobile applications to our clients with the following features:

Top Features For Community

Softqubes provided a unique and innovative set of features, such as scrollable feeds for community updates. Our UI/UX design elements are user-friendly, helping users seamlessly make court reservations and connect with coaches for personalized training sessions. We provided the top features below:

Booking Management

Users can manage bookings efficiently, share scorecards with friends, and view schedules.

Match Organization

Players can seamlessly organize...
