

# 8 Ingredients solve your All Hair Problems

When it comes to maintaining your hair, the ingredients can make all the difference. Natural Plant-based ingredients are always healthier than you think, It solves all your Hair related problems to transform your hair. Here are eight <u>natural ingredient</u> to solve your hair related problems:

### Amla

Amla is a powerhouse of nutrients, rich in Vitamin C and antioxidants. It strengthens your hair follicles and promotes hair growth, protecting your hair from graying. Amla also reduces dandruff, making it a part of hair care routine to healthier scalp.

# Bhringraj

It is known as "King of herbs" for hair care. It has the ability to reduce hair loss and promote new hair growth. Its natural properties protect your hair from graying and soothes the scalp. It is an ideal ingredient for hair thinning and scalp irritation.

#### Shikakai

Shikakai is a natural cleanser from centuries ago, it is used in traditional hair care routines. It cleanses hair without stripping your natural scalp oil, which keeps your hair soft and manageable. It also promotes hair growth and reduces dandruff, it is an excellent ingredient in all hair care ingredients.

#### Water

Water is a essential part for hydration, not only for body also for your hair. It helps to dissolve and distribution other ingredients to evenly spread in your hair. It ensures that your hair absorbs the maximum benefits of products which you can use.

#### Aloe vera

Aloe vera had soothing and moisturizing properties. It reduces dandruff, conditioning your hair and promoting healthy scalp, which is an essential part for hair growth. Aloe vera also helps to lock moisture for making hair soft and shiny.

# Glycerin

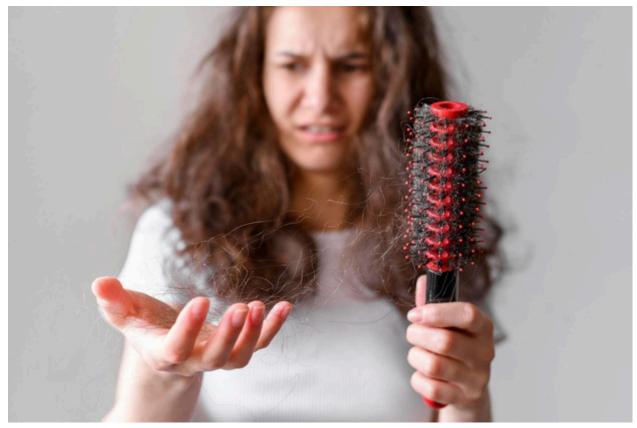

Glycerin is a humectant, to attract moisture from the air into your hair. This is to keep your hair hydrated, soft, healthy and manageable. It is more beneficial for those people who have dry and curly hair. It's moisturizing properties, leaving your hair feeling soft and nourished.

# Citric Acid

Citric Acid helps to balance the ph level of your <u>hair care products</u>, ensuring that they are gentle on your scalp. Usually it is added in small amounts to hair care formulas to adjust their acidity, making them more effective and scalp-friendly to keep your hair clean and refreshed.

# Fragrance

Fragrance seems like an optional addition, but it plays a significant role in the experience in your hair care routine. A good scent makes your routine more enjoyable. Fragrance is added in small amounts to hair care products to enhance your experience.
