Understanding Piles and Their Treatment

Piles, also known as hemorrhoids, are swollen blood vessels in the rectal area that can cause significant discomfort. Common symptoms include pain, itching, and bleeding during bowel movements. Dr. Bhavesh Doshi, a renowned Piles Surgeon in Borivali, emphasizes early diagnosis and treatment to prevent complications.

At Dhanvantari Hospital, the treatment options for piles are diverse and tailored to the severity of the condition. Dr. Doshi offers both surgical and non-surgical treatments, ensuring that each patient receives the most appropriate care.

Advanced Piles Treatments Available

Dr. Bhavesh Doshi utilizes advanced techniques for the treatment of piles, including:

1. Rubber Band Ligation: A minimally invasive procedure where a rubber band is placed around the base of the hemorrhoid to cut off its blood supply, causing it to shrink and fall off.
2. Sclerotherapy: This involves injecting a solution into the hemorrhoid, leading to its shrinkage.
3. Infrared Coagulation: A procedure that uses infrared light to coagulate the blood vessels in the hemorrhoid, causing it to shrink.
4. Hemorrhoidectomy: Surgical removal of severe or prolapsed hemorrhoids.

These treatments are performed with precision and care, ensuring quick recovery and minimal discomfort for patients.
