Example page

See how simple and powerful is JustPaste.it!

1. You **can** *format* <u>your</u> text
2. as
3. [you](#)
4. like.

<div align="right">You can align it.</div>

You can change it's directionality (for right-to-left languages):

<div dir="rtl" align="right">التكرار يعلّم الحمار.</div>

You can paste images:

You can embed video:

```
[video]https://www.youtube.com/watch?v=2fngvQS_PmQ[/video]
```

...your application code:

```
[code]
<?php
        // create curl resource
        $ch = curl_init();
        // set url
        curl_setopt($ch, CURLOPT_URL, "example.com");
        //return the transfer as a string
        curl_setopt($ch, CURLOPT_RETURNTRANSFER, 1);
        // $output contains the output string
        $output = curl_exec($ch);
        // close curl resource to free up system resources
        curl_close($ch);
?>
[/code]
```

```
    // set url
    curl_setopt($ch, CURLOPT_URL, "example.com");

    //return the transfer as a string
    curl_setopt($ch, CURLOPT_RETURNTRANSFER, 1);

    // $output contains the output string
    $output = curl_exec($ch);

    // close curl resource to free up system resources
    curl_close($ch);
?>
```

Lastly, using **Save as PDF** link, you can get any note and read it offline.

Our pages looks great on mobile (thanks to "responsive design"), and have short urls (which are customisable).
