

Your Guide to Salesforce for Nonprofit Tutorial and Fundraising

Salesforce is the world's no. 1 CRM with a global customer base of over 150,000 companies. Scalability, cloud storage, and world-class apps for service, sales, etc. make it a popular choice.

Out of a number of Salesforce products and solutions, Salesforce Nonprofit Success Pack is a popular product under the Nonprofit cloud. It is an open-source community-built software. Over 47,000 nonprofits helped build this nonprofit technology to help enhance constituent relationship management. It helps program management, donation management, trusted accounting, and more.

In this post, we are going to discuss Salesforce for fundraising and Salesforce for Nonprofit Tutorial for K-12 education in detail.

Salesforce for Fundraising: Putting People First

Salesforce's fundraising solution is designed to help you engage more effectively with donors and funders. Here's how it can transform your fundraising efforts:

1. Digital Fundraising Optimization

- Connect donation pages and payment services directly to your NPSP
- Mobile-optimized for donations on any device
- Centralized management of donor and donation data

2. Multi-Channel Donation Management

- Unify multiple giving channels on a single platform
- Easily allocate funds to specific programs
- Streamline tracking and accounting processes

3. Enhanced Direct Mail Strategies

- Leverage record deduplication and address standardization
- Automatic address updates via National Change of Address
- Implement multi-channel communication strategies

4. Financial Reporting and Transparency

- Simplify donation data preparation for finance teams
- Meet complex financial reporting requirements
- Improve revenue reconciliation and organizational transparency

- Access real-time analytics for efficient reporting
- Ensure accountability and stewardship with robust tools

4. Effortless Event Management

- Easily post and manage event calendars
- Track RSVPs and generate VIP summary reports
- Create table seating charts for smoother event execution

How to Implement Nonprofit Success Pack

To avail Salesforce for Nonprofit Tutorial and Fundraising, install NPSP first.

NPSP has several “managed packages”. These packages are bundles of custom Salesforce components like objects, report types, workflow automation, etc.

If you want to avail of NPSP, install NPSP packages first into a Trailhead Playground.

Trailhead Playground is a test environment to explore and test customizations without affecting your real Salesforce organization.

Note: Only up to 10 active Trailhead Playgrounds at a time are permissible.

To create a Trailhead Playground, follow these steps.

- Create the Playground before installing NPSP.
- Login to Trailhead. Go to the bottom of the page.
- Click on Create the playground name and Create Playground following that.
- Note your new playground name once generated somewhere for future reference. You can also give your playground a unique name to recall it easily. For that, you can click Hands-on Orgs in the Personal Settings window in the top corner and choose Rename.
- Press “Install NPSP” and click Save.

Once you create Install NPSP Playground, retrieve the assigned username and reset your password as follows.

- Click on the Personal Settings Menu by clicking your photo or icon in the top corner.
- Click on Hands-on Orgs.Personal settings menu.
- On the Hands-on Orgs Page, click the Launch button on the Install NPSP Trailhead Playground. It will open the specific Playground in a new tab on your browser.
- Click on the Setup gear>Select Setup.
- Click on Users.
- Find your user name and check the box next to it.
- Note down your username for Install NPSP Trailhead Playground.
- Click on Reset Password(s) and OK.
- Open your password reset email link and follow the steps to reset the password.

This completes your NSPS installation process.
