

Wazdan revamp classic in 9 Lions: Embracing Jackpot

Wazdan, a leading gain-focused developer, offers players a refresh of their favorite slots in its latest offering, the 9 Lions Hold the Jackpot.

Returning to the ancient Chinese temple, which hosts the classic 3x3 grid, players attempt to land at least the bonus symbol in the middle row to activate the provider's famous Hold the Jackpot bonus round.

With Wadzdan's latest title only running as a bonus symbol, the added dimensions optimize a significant chance of winning, and the Grand Jackpot now soars to a whopping 750 times the player's initial bet.

The Lions bonus game is activated when the lion symbols corresponding to the bonus matrix are gathered. In the bonus game, players choose either a cache symbol that has the potential to trigger a grand jackpot due to the one-click 2 grand feature, or a Lions symbol that can draw a Lions jackpot mystery.

Chance levels with up to 6x multipliers improve access to both bonus games. Landing Collector symbols contrast all cache and cache infinity symbols displayed, then provide up to 20x random boost.

Wazdan's latest release demonstrates its innovative new capabilities as one of the most successful games in recent years, while driving player retention and delivering proven results for partners.

Andzej Hyla, Wadzdan's chief commercial officer, said: "Higher gameplay for pre-established hits can enhance your gaming experience, expanding your strong existing player base. [홀짝 게임](#)

"With all-encompass bonus gameplay and stimulating bonus games, we look forward to nine Lions enthusiasts who increase their chances of winning and enjoy a successful title comeback."
