DRIVING HAPPINESS

TURBOCHARGE YOUR JOURNEY- EXPERT FULL CAR TUNE-UP

Regular engine tune-ups bring power and efficiency back to your car. We visually inspect all of your engine components and install new parts (including spark plugs and fuel filters) as needed. When you get a full car tune up based on your vehicle's manufacturer recommendations, you're investing in the long-term health of your car, saving you time and money. Our skilled technicians will inspect your engine, analyze vehicle performance, and make adjustments as needed.

Our engine tune up checklist includes

- Inspect the spark plugs to gauge their age and wear.
- Test the performance of spark plugs and that they are properly igniting the fuel.
- Check spark plug wires to make sure they are not hard

or cracked.

- Check the fuel filter to make sure it isn't clogged or dirty.
- Check the engine's fuel pump for proper function.
- Inspect the engine's fuel injectors to make sure dirt or other deposits are not restricting the amount of fuel that can be delivered to the engine.
- Make sure fuel injector buildup isn't affecting how the spark plugs fire.
- Adjust the engine timing and idle if necessary.
- Check that the PCV valve isn't clogged or leaking.
- Inspect the vehicle's points and condenser.
