

# Manchester United is actually laughing because of Ferguson

It has been argued that Manchester United is rather positive about the injury of Lenny Yoro, a freshman who has not been able to play for about three months. The idea is to help Yoro adapt by using the approach to dealing with freshman players used by Sir Alex Ferguson, Manchester United's best coach of all time.

"Manchester United considers defender Lenny Yoro's absence from the game for three months due to injury as a positive result," adding, "Club sources see Yoro's absence as an opportunity for the 18-year-old to adapt to Manchester life and become accustomed to the new environment."

The approach was initiated by Ferguson who has led Manchester United for 27 years. The media said, "One of the Manchester United employees said Sir Alex Ferguson used the same approach to new injured players." [메이저사이트](#)

Manchester United manager Erik ten Hag also opened up about Yoro's condition. "Injuries are inevitable in football. Especially in top-notch football. Every player has to reach their limits," he said. "We have to be ready to overcome them as a team, and the players are doing well to overcome the frustration. They (Yoro and Rasmus Hoyerun) are very positive and they are already recovering and will come back."

Yoro, who moved to Manchester United this summer, was replaced during the match due to injury in the pre-season game between Manchester United and Arsenal at SoFi Stadium in Inglewood on the 28th. Coach Ten Haach declined to say anything related to Yoro's injury in an interview after his injury.

However, Yuro's injury was more serious than expected. After his injury, he showed up at the training site, but was wearing protective boots on his left foot and crutches. He will not be able to participate in games for about three months, according to reports.

The extent of Yoro's injury was consistent with the report. Manchester United announced on its official website on the 2nd that Yoro would not play for about three months.

Yoro was not the only problem for Manchester United. Manchester United also announced that striker Hailun, who was replaced by an injury along with Yoro in the match against Arsenal, would not be allowed to play for six weeks.

The two players were not everything. In a friendly match with Real Betis on Monday, Marcus Rashford and Antony were substituted due to injury. While details of the two players' injuries are unknown, Manchester United said they were right.

Manchester United is most disappointed with the injury of freshman Yoro. Yoro's injury is the worst, but expectations were high for him because he brought him this summer.

Manchester United announced on the 19th that it had signed a six-year contract with French center back Yoro, who was born in 2005. It was a contract that allowed him to play for Manchester United for up to seven years due to the option of a one-year extension. The competition to recruit Yoro was also fierce. Many big clubs including Manchester United, Real Madrid, and PSG wanted to recruit him, but Manchester United offered the highest transfer fee and successfully secured Yoro. According to the BBC, Yoro's transfer fee is reported to be 52 million pounds (about 90.6 billion won).

There is a reason why Yoro is so popular. Although he is 18 years old, he made his debut in the first team of the French team in the 2021-22 season and played full time in the 2023-24 season, displaying stable defense capabilities. It contrasted with most players of his age playing in youth teams.

Manchester United intended to use him as a starting center back for the upcoming season. Yoro joined the team immediately as soon as the transfer was announced and started in both friendly matches. There were mistakes, but they showed promise.

However, he has been sidelined for about three months due to injury, and Yoro is expected to make his official appearance as a Manchester United player only at the end of October or November. Due to Yoro's injury, Manchester United is speeding up its bid to recruit a new center back.

Manchester United also had Casemiro, a defensive midfielder, at the end of the season due to a series of injuries to center backs in the 2023-24 season. Manchester United is determined not to repeat its past mistakes by reinforcing its center backs.

Manchester United are continuing negotiations to sign Bayern Munich centre-back Matheis Diricht and Everton centre-back Jared Branthwaite, who were rumored to be transferred.
