

Son Heung-min, why did you argue with a fan outside the training ground?

Captain Son Heung-min, who is infinitely warm to his fans, did not lose his smile even in situations where he could be angry.

Tottenham captain Son Heung-min has received a lot of attention for his love for his fans. He didn't forget to say hello to his fans after the game, and in this season's opening game, he led the previous team to the fans and thanked them. He also had no hesitation in fan service, such as taking autographs and photos with fans who visited the training site.

However, even Son Heung-min had a fan who made him express his anger. It was hard to say that he was a true fan.

"Son Heung-min had an argument with a fan in front of the team's training ground."

"Son Heung-min had a minor argument while signing autographs for his fans," The Boyhotspur said. "Son Heung-min was filmed getting angry at a man who asked for multiple autographs. The man complained that he gave two autographs to another fan and only one to himself."

He also shared a video of the situation. In the video, a fan complained that he did not give two autographs to himself. He said it was not a problem and asked for more autographs. However, Son refused to give additional autographs, saying, "Why is it not a problem?"

It is presumed that Son Heung-min rejected the fan's signature because the fan was a seller who professionally receives signatures from players and sells them. "It is presumed that the fan is a person who receives several autographs and sells them," said The Boy Hotsper.

Son has been unsparing in signing autographs for his fans. Even after the last victory over Crystal Palace, Son was seen signing autographs for fans sitting behind him before leaving the bench.

However, he often showed strict response to the seller. Son Heung-min's various images were also released on Tottenham fans' SNS. The fan who released the video also defended Son Heung-min, saying, 'Don't bother Sonny. He's the best man we've ever met. He's our captain.'

Son Heung-min did not lose his smile even though he responded strongly to the fan, and he later thanked the fans and showed him trying to take additional pictures.

The fans in question get autographs only as a means of earning money, rather than fans' affection for the player, which is highly likely to negatively affect the normal relationship between the fans and the player. Son has strongly responded to some of these malicious acts.
