If you use an address different from the one given here, it might be an unauthorized, out of date copy. That's the case of asstr.xyz: please, do not use that site.

If you are using the proper address but the site still seems out-of-date, try refreshing the page: it might be a problem with your browser's cache.

You can also download an up-to-date copy of the whole archive from here.

This now includes the latest update (April 2025).

You can download a zip file containing an up-

to-date copy of the archive here (this is the complete archive, not just the new update, so you do not need to save the previous versions):

The old site at ASSTR is

Down

<https://www.asstr.org/~puericil/main.html>

Our old host, asstr.org, is down again, and given its general state of abandonment during the last few years it's likely that's the end for that historical site. Thank you for all these years, ASSTR!
