

# Deck Builders Near Me: How to Maximize Small Outdoor Spaces in Barrington, IL

Living in [Barrington, IL](#), offers beautiful neighborhoods and charming homes, but many homeowners face the challenge of making the most out of limited outdoor space. If your backyard or patio area is on the smaller side, you might wonder how to create a functional, inviting deck that fits your lifestyle without feeling cramped.

At [Decked Out Builders LLC](#), we specialize in [deck building near me](#) **Barrington, IL**, and we know how to transform small outdoor areas into stylish, usable retreats. Here's how you can maximize your small outdoor space with smart deck design and expert craftsmanship.

## 1. Choose a Compact, Multi-Functional Design

When space is tight, every square foot counts. Multi-functional designs—like built-in seating with storage underneath or fold-down tables—allow you to maximize usability without overcrowding your deck.

**Decked Out Builders Tip:** We often recommend **L-shaped benches** or **corner seating areas** to save space while creating comfortable gathering spots.

## 2. Opt for Vertical Elements

Think vertical, not just horizontal. Incorporating features like **vertical planters**, **privacy screens**, or **trellises** with climbing plants adds greenery and privacy without taking up deck floor space.

Vertical design also draws the eye upward, making your outdoor area feel larger and more open.

## 3. Select Light, Reflective Colors

Lighter decking materials and finishes can visually expand a small area. Choosing colors like light gray, natural wood tones, or even whitewashed composites helps reflect sunlight and brighten the space.

## 4. Use Transparent or Minimalist Railings

Traditional bulky railings can make a small deck feel boxed in. Instead, consider **glass panels**, **cable railings**, or slim metal spindles to maintain safety while preserving open sightlines. At **Decked Out Builders LLC**, we install modern railing systems that are both code-compliant and visually unobtrusive, perfect for small spaces.

## 5. Incorporate Built-In Lighting

Good lighting can make your deck feel more spacious and inviting after dark. Installing **under-rail LED strips**, **step lights**, or **post cap lights** brightens the space without adding clutter.

## 6. Prioritize Quality Over Quantity

Small decks benefit from **high-quality materials** and craftsmanship. Using durable composite decking or treated wood ensures your compact space stays beautiful and functional with minimal upkeep.

## Why Choose Decked Out Builders LLC for Your Small Deck Project?

As local **deck builders near Barrington, IL**, we understand the unique challenges and opportunities small outdoor spaces present. We customize every design to fit your property, budget, and lifestyle—turning even the tiniest backyard into a personal oasis.
