

Streamlining Document Management with Digilocker: A Digital Revolution

The Indian government provides Digilocker, a digital locker, to its residents, reducing the burden of carrying hard copies of their documentation everywhere. That is included in the push for digital India.

It can be challenging to carry hard copies of your documents at all times. Not to mention the chance of losing or misplacing your paperwork. Therefore, the government has implemented this new function where you may save all **documents** and use them **anytime** you want to minimize your **efforts** and keep your documents safer.
