

# 5000+ industry professionals rely on ALSTASCALE DS85 for descaling operations. Learn why?

**ALSTASCALE DS85** is highly regarded by industry professionals across multiple sectors, including pharmaceuticals, oil refineries, and power plants, for its exceptional passivating and descaling abilities. This trust stems from its comprehensive formulation that not only effectively removes scale and rust but also safeguards equipment during the descaling process.

## **Comprehensive Cleaning Solution**

ALSTASCALE DS85's formulation is designed to tackle both scaling and corrosion, common issues in industrial systems that use water as a heat transfer medium. Scale build-up and rust can significantly impair system efficiency and lead to premature equipment failure. ALSTASCALE DS85 addresses these challenges by combining organic acidic compounds and alkaline carbonate salts, which work together to dissolve scale while preventing new deposits.

## **Enhanced Equipment Longevity**

The inbuilt corrosion inhibitors in **ALSTASCALE DS85** make it a preferred choice for facilities aiming to extend the operational life of their cooling towers, boilers, and heat exchangers. By preventing metal degradation during the cleaning process, ALSTASCALE DS85 ensures that systems continue to operate at peak performance with minimal downtime.

## **Adaptable Across Industries**

Given its versatility, ALSTASCALE DS85 is suitable for a wide range of applications. It can be effectively used in both high- and low-pressure systems, making it adaptable to various operational needs across industries. This flexibility is crucial for industries that require a reliable solution capable of handling different types of equipment and water quality issues.

## **Economic Efficiency**

Using ALSTASCALE DS85 can lead to significant cost savings over time. By maintaining system efficiency and reducing the frequency of maintenance shutdowns, it helps industries minimize operational costs and avoid expensive repairs or replacements. This economic efficiency is a key factor in why over 5000 professionals continue to rely on this chemical for their descaling needs.

Professionals trust **ALSTASCALE DS85** because of its proven effectiveness, safety, and adaptability, making it a cornerstone in maintaining industrial equipment. This widespread adoption highlights its role as a critical component in industrial maintenance programs aimed at maximizing uptime and efficiency.
