# Zirakpur HTML Training Course : A class on the language of web design

**HTML training course Zirakpur** at Squads Industrial Training aims at educating someone interested in understanding the development of web pages with the use of HTML. Whether you are starting fresh or getting refreshed with skills, you will surely get a profound understanding of HTML, the markup language forming the skeleton of every website. It begins from the grounds: you will write clean, structured HTML code and use the right syntax to do so. Then it goes ahead to work with forms, embedding multimedia, and creating tables. The course introduces you into modern web development practices that emphasize mobile-friendly, responsive designs, keeping your website user-friendly and search-engine-friendly. What will make the difference in this course is the hands-on approach: you will be working on real projects with HTML in conjunction with other web technologies. By the end of the course, you will not only create your own websites but also be geared for a web development future.
