

Intel Drop #38 - The Coming Timeline Of Events - Part 2

"They said they fear that more than anything, because this person with high level access who they met says they fear it more than anything else."

Intel Drop #38 - The Coming Timeline Of Events - Part 2

Join **Bill's Twitter** [here](#), and our **official We Are Sovereign Twitter** [here](#). Our official email is securecommssov@proton.me.

Update: If you have recently found our information, we recommend reading all of our posts going back to July of 2022, which have covered a multitude of issues in detail. You can find an [introductory article here](#), our *new* Intel Drops [here](#), and our *older* (censored) Intel Drops and (censored) website backed-up [here via PDF \(Telegram link for download\)](#), Google Drive [PDF \(Intel Drop #1 starts at page 105\)](#) or [here via the Wayback Machine](#).

Note: We also recommend reading our *Cosmic Rules Are About To Change* series of Intel Drops for the full context of what is transpiring from a spiritual perspective ([Part 1](#), [Part 2](#) & [Part 3](#)).

Intel Drop #38

The following was collated from a few wide-ranging conversations covering many topics. As always, these conversations are edited by [Michael](#) for clarity and for obfuscation purposes (see: [Stylometry](#)).

The following Intel Drop contains multiple sections that address the following:

Section A - The Coming Timeline Of Events (Part 2)

Section B - CSRQ Whistle-blower Update

Section C - New Email For Sov. Status

The Coming Timeline Of Events - Part 2 - [Section A](#)

Bill: It's probably good if we talk about an overview of what's been going on. Are the [comms issues](#) we've been having a good place to start?

Gideon: "Yes."

Bill: You had a very high-level meeting that was in-person with other individuals who we think are trustworthy, which was discussed in [the last Intel Drop](#). After that, [everything went haywire for you and me](#). Was that related to that meeting?

Gideon: "I believe so, yes. I believe that because other individuals who were there have told me they are also experiencing what you would call 'comms issues' and other problems."

Bill: So, the cabal knows who they are and who you are? They know when and where the meeting took place?

Gideon: "Yes and no. We do not believe they know the exact location, but they do know there was a meeting and they seem to have intel on at least some of those who went to it."

Bill: How much contact have you had since this meeting with that group, or those people you met?

Gideon: "Some contact, what I would consider very valuable contact so far."

Bill: I guess you can't say too much, but are they helping you? Are they helping us?

Gideon: "They are, yes, as best they can."

Bill: They all know we're up against this cabal, right? I mean, they're all on the same page we are?

Gideon: "I generally felt that way, but I also felt some of the ex-military officials there, most of them retired, did not fully understand the big picture. That concerned me."

Bill: Did you try to talk to them or tell them about the extent of all of this?

Gideon: "No, I listened and made cordial introductions is all. I did not feel they were the type of people whose minds would change in one conversation."

Bill: I know how important this Intel Drop is to people, so let me try to stay on track here and ask questions that people care about. I have some notes, and I wrote down to ask about [the coming events this Winter](#). Has that status changed?

Gideon: "We think it is possible it has, because the plan was leaked with our last Intel Drop. Incredibly, the post itself received far more views than others in the past. Do you have the current view count?"

Bill: Let me look. Yes, it's 24,400 views for our last post. That's a lot more than the other posts, and [on Telegram it got 50,400 views](#), which is amazing. So, a lot of people saw the last Intel Drop.

Gideon: "I was told the cabal is aware of this."

Bill: Why didn't they just take it down, or 'nuke' everything we have up?

Gideon: "I do not know. I can only make some educated guesses. I have been told by a source of mine that we are protected, to some extent. I have also been told by someone else that the cabal intends to use us in some way, which gets into things we've talked about before."

Bill: You mean how they think they can bribe us later on, since we're Sovereign status in CSRQ?

Gideon: "Yes, precisely. They believe we will not want to give up our status and the benefits that come with it. They believe we will not be a threat because we will not want to give up Sovereign status after CSRQ comes online and after these events take place."

Bill: Ok, right, we talked about that a lot. They still attack us with these agents, why is that? [Our Telegram](#) was inundated again a few weeks ago and we had to close it and removed a lot of people causing trouble.

Gideon: "The agents are assigned to constantly discredit us and dissuade a larger audience from taking any of the intel we present seriously. They want to sow doubt and confusion, that is all."

Bill: Ok. I'm always getting off-track, so let's get back to this group you met with and everything that's transpired since. This technology they have is amazing. I won't get back into all that, but if anyone reading this wants to know, please just [read the last Intel Drop](#). I wanted to ask you if you have any updates or thoughts to add to what you saw and witnessed?

Gideon: *"Most of what I wanted to convey was reported in the last Intel Drop. There are some new things I have been told outside of that meeting, though, that concern me. I cannot confirm them fully, but they tie into what we are expecting."*

Bill: What are those things?

Gideon: *"They are planning the unthinkable, in my view. Most will not believe it if you told them. It goes beyond what most would or will accept as truth or possibility."*

Bill: Ok, we've talked about a lot of things that go outside the box. I'm sure our readers can handle it. Can you explain more of what you mean?

Gideon: *"It has to do with augmented reality and the soul essence. Each of us has a soul. The cabal wants to control it, or us. I have spoken a lot about this in the past, in the Cosmic series we did, but what I have learned is new. It is not what I could even comprehend at first."*

Bill: Ok, augmented reality, like this trans-humanism push we see with the tech giants? How will it happen?

Gideon: *"It is being implemented with CSRQ. Now, we spoke earlier, you said you want a separate section for updates relating to CSRQ and the whistle-blowers. Should we discuss this then? Because it is the whistle-blowers who told me about this, it is coming directly from them."*

Bill: Yes, we can do that later. I'll make a note of this so we get back to it. Let's go back to this Winter event. Do you want re-cap it at all, or should people just read the

last Intel Drop? Do you have any updates on it?

Gideon: *"I have only been hinted to that our exposure of it may have disrupted their plans. But I cannot confirm that. I am preparing as if the information will occur as I saw and reported it. Certainly, I hope it does not happen."*

Bill: It scares the hell out of me that they will do it. You've told me they want to see fear and bloodshed, they want this to happen. Can I ask you this, is anything stopping them? Are there good guys, so to speak, standing in their way?

Gideon: *"There are. This group I met with, for example. Our group, for example. There are small groups, but they small, Bill. The cabal sees us like annoying flies that they just swat away. They see us as something to keep an eye on, monitor, and sometimes they intervene, but we are not considered serious threats."*

Bill: Ok, but if you really did expose their real plan, and you said they might change it, it seems to me we could do a lot of good, or we already did by exposing it.

Gideon: *"I was told they do not care if they have to change plans now and then. They know this group I met with has this technology, but so does the cabal. It is very high-level concepts we are dealing with, in terms of timelines, time alteration. I was told the cabal's technology is more powerful, because they have CERN and these colliders that can alter space-time."*

Meanwhile, the group I met with can simply see things and observe things, but they cannot alter anything or even see the alterations the cabal will execute. It is very confusing, and I do not want to confuse anyone reading. I hope I am explaining this adequately."

Bill: You are, you are. I want you to continue on this, because it's really interesting to me. So the cabal isn't that worried, because they can actually change the future, while this group you met with can just see it?

Gideon: "Yes, correct. There is a big difference between being able to see the future, and being able to see it and change it."

Bill: Very true. Can the cabal feed this group, your group you met, false views or images of the future, to confuse them?

Gideon: "That is a very good question, Bill, and one that was addressed at length. By viewing the future, the cabal can actually detect them in doing so. The cabal then can intervene and make changes."

It is very complex, but it presented some problems, some people I spoke with described these problems as limitations of the technology. There was some frustration, because the cabal holds the keys to this, in these billion-dollar particle colliders that only they can access."

Bill: So when they look to the future, they hope they are seeing the real thing but they're not fully sure or confident because the cabal could change it?

Gideon: "They think upon the first viewing of it, it is accurate. Upon further viewings, or each time a new person views it, like I did, there is a degradation in the likelihood of it or accuracy because the cabal can detect that it is being viewed."

Bill: By viewing it over and over, could it mean you're stopping it?

Gideon: "No, unfortunately, not in how we think. The cabal will make adjustments. I was told it does not matter, because the cabal will create conditions so their outcome is always achieved. I was very upset by that answer, by the way, and so were others."

Bill: You told me, one way or another, the cabal wants this digital currency, USDR, and CSRQ and so on, no matter what. The group you met agreed with that, right?

Gideon: "Yes, that is not in question. It is only matter of how it will come about. The group is trying to figure it out with this timeline technology, trying to see

what the cabal will do, but as I said, the cabal is sort of one step ahead because they actually have the technology to physically alter timelines, not just view them."

Bill: How close are we to CSRQ and all of it?

Gideon: "This should be discussed in the other section you wanted to do on the whistle-blowers."

Bill: Ok, I think we should get to that now.

Gideon: "Very well."

CSRQ Whistle-Blower Update - Section B

Bill: I'm sort of glad to get into talking about this, because I feel like every time we talk about the whistle blowers we're dealing something tangible. All the timeline stuff and CERN, and what the cabal is planning, it makes me sick to my stomach because we have no control, no way to stop it, it feels like.

Gideon: "I can relate to that feeling."

Bill: Do you agree, though, with how we've worked with the whistle blowers, we have an actual chance to do something?

Gideon: "Yes, I do, because I have always believed it is an unbelievably important mission, because of the position they are in and the fact they are helping us."

Bill: Ok, one very big frustration has been how difficult it is for them to help us, and how slow and careful that process has to be. In the past year, they were only able to edit a couple of dozen people's CSRQ profiles, but we had hundreds write us who we had to turn away or couldn't help. You said there's a big update on that. What's going on?

Gideon: "There is a major development. It is first important to understand the whistle blowers position within the CSRQ operational structure. They are in a fairly high position in terms of access, but the cabal has known there are people leaking information, they just could not identify them. We have found out something the cabal was doing, so I will get into that."

Bill: Ok, doing what, in what way?

Gideon: "The whistle blowers figured out they were being given false info, along with everyone else in their department. That way, what ended up in our Intel Drops was, in part, false in terms of some things we reported about CSRQ. Not all of it, mind you, but some of it. It was a clever move by the cabal, and it worked."

Bill: Ok, did any of it effect our team, or if they were successful in changing their status to Sovereign? We're all still Sovereign status, right?

Gideon: "Everything is OK in that respect. What I am talking about is the whistle blowers were given memos and info about CSRQ and how it works, and it was false, and then they fed it to us, unknowingly. Now they know what is going on."

Bill: How do they know now?

Gideon: "There is an individual with rather high authority who they developed a relationship with. This took a few months of in-person meetings, and it began with notes, hints, clues, if you will, along the way."

Bill: So, someone on the inside knows who the whistle blowers are, and they are helping them? This scared the hell out of me when you first told me, because I thought the whistle blowers were exposed.

Gideon: "They were worried, too, so was I. There has been a lot of back and forth here. We are no longer concerned, because the person helping them, and us, took a lot of steps to prove to them that they are basically on our side."

Bill: What kind of steps?

Gideon: "They gave the whistle blowers the power to expose this person and destroy them, if they wanted to. It was a gesture of trust. I cannot get into how or what was done, but if I wanted to, or if the whistle blowers wanted to, we could dismantle this person's life, their family, with the information they entrusted us with. We will not do so, of course, so long as they maintain our trust."

Bill: I see, ok, I think I understand. So what did this person tell the whistle blowers? What were these hints and clues?

Gideon: "They first sent some encrypted notes via the internal messaging system they use, then it eventually led to face to face meetings that were arranged as work-related meetings. Then during those meetings, this person communicated more to the whistle blowers that they had things to reveal and tell them. What was revealed was the misinformation they were being fed along with the entire department, some of which ended up in our Intel Drops."

Bill: I guess by talking about this now, we're revealing that we know what the cabal is doing. Why did you want to reveal this now?

Gideon: "Because the misinformation the cabal is feeding their department is irrelevant now. The individual who is helping them has high-level access. We know many more details now, and have a much better picture of what is coming. We will not discuss most of those things in this Intel Drop, however. This individual also set something up that will help us, too."

Bill: What is that?

Gideon: "One of the biggest difficulties we had was the slow, careful process of converting statuses within CSRQ, which you touched on. To change someone from Restricted class, for example, to Sovereign class, required a series of steps, some of them risky, and involved spoofing data and so on. It was so tedious, we could only alter a handful of accounts over the past year. This has changed."

Bill: In what way?

Gideon: "The individual who is helping the whistle blowers streamlined a process, or pipeline, whereby we can use numbered identifiers and convert far more people to Sovereign status with much lower risk."

Bill: Ok, that's great, but is there any way the cabal can detect that or see it? Won't they notice if we change a lot of people to Sovereign status?

Gideon: "No, because we do not expect to change more than a few hundred people, unless more people contact us than we expect. The cabal is also adding thousands of new Sovereigns per month, so it will not be abnormal, and the whistle blowers and the individual helping them have developed advanced obfuscation techniques to remain undetectable. I will have Michael explain this more in the email for those who inquire about it."

Bill: Good. Now, you've told me Sovereign status is the single most important thing in the world right now, the only thing that can save anyone. Do you still believe that?

Gideon: "Yes, I believe that, and even the cabal seems to believe it. It is very important to them."

Bill: You still don't think it's wrong to have Sovereign status? We aren't compromising ourselves, our morals in any way? As in, we're not joining the bad guys?

Gideon: "No, I do not believe it is wrong. This is because Sovereign status conveys with it no requirements, no contract with the cabal at all. We will not be required to be vaccinated, to have any implants, to have limitations in any way, limitations on travel or free speech. The cabal wants this for themselves, too. Sovereign status in CSRQ is not really a status at all, it is just complete freedom."

Bill: Ok, you were going to talk about this augmented reality, something you said no one would believe. What was that about?

Gideon: "It is what was told to the whistle blowers by this individual with high-level CSRQ access. He said anyone who is not Sovereign status will be implanted with a chip that will somehow augment their soul essence and connect it to some kind of network that is being set up."

Bill: Like a cell network? What do you mean?

Gideon: "He told them no one knows about it, but it is not cell or WiFi as far as we know. He said it could not be dismantled or stopped. The whistle blowers asked him if it was Starlink, and all he did was give a very subtle 'nod' but would not speak further. They said he was very nervous discuss it, but it seemed he wanted to tell them."

Bill: Does he know it could end up in this Intel Drop? He knows the whistle blowers talk to you.

Gideon: "Yes, he is aware. He wants people to know, but he is a afraid and so are the whistle blowers. If they are found out, of course, it is possible they would be killed, but they are more afraid of being augmented."

Bill: You mean with this tech?

Gideon: "Yes, they believe if they were found out they may not even be punished or arrested, they would just be fired and made Restricted or Quarantined class. They said they fear that more than anything, because this person with high level access who they met says they fear it more than anything else."

Bill: So the cabal would not even kill them or punish them? How can that be? They're sabotaging things.

Gideon: "This is where it gets a bit strange. I am hearing more and more, from my sources, and from the whistle blowers, that the cabal does not care that much about whistle blowers or anyone finding the truth. That is because of CSRQ and this augmented chip, it will somehow just give them total control. All

these circulating threats are minuscule compared to what CSRQ will do to the world."

Bill: That's right, we talked before about this, how the cabal doesn't even care if the truth comes out! You've said that. So, this is just confirming that?

Gideon: "It is. The cabal is being more open about things, more is coming out. Most of it is still through gatekeepers, but a lot is being revealed. Even RFK Jr. is speaking rather candidly about extremely censored ideas, and it is being allowed."

So, that is very much in line with what we have concluded, that the cabal wants to monitor or gate-keep some information, but does not care if truth gets out. That is, in fact, quite scary because it means they either believe they are invincible or something else."

Bill: Something else would be CSRQ, right? They must know what's coming is just total enslavement and is unstoppable.

Gideon: "They seem to know that, yes, so people talking about the truth or waking up is more an inconvenience for them, not a threat. The system they are going to implement is too powerful, because it is money-based, and people are controlled through money, everyone is. It is the root of all evil, after all."

Bill: Ok, I want to ask about the actual tech, though. How will this work? Did they tell you how this chip gets implanted?

Gideon: "They do not know specifics, because this discussion took place only once with the high-level individual, in person, and he was nervous. They only know that anyone who is not Sovereign status will be chipped. They had the impression it would not be obvious or something anyone would even know about."

Bill: You mean maybe through the water or food?

Gideon: "Possibly, but they believed through the banking system somehow. I asked and pressed them on this as much as I could, but they just did not know. They only felt it would be surreptitiously done, as in, someone could end up with this augmented implant and not even know it. They just said all Common, Restricted and Quarantined status people would get it."

Bill: But Sovereign status people will not have this?

Gideon: "No, they will not."

Bill: There's one more thing you told me that scared them the most, do you want to talk about it here?

Gideon: "It is the thing that I think no one would believe. It has to do with our soul, or soul essence. It is probably the most terrifying thing ever told to me, and I worry it is too much to reveal here."

Bill: You know our readers can handle it.

Gideon: "I know. I do. It sickens me to ponder it. I will just say, this augmented chip is going to chip away at, or degrade our souls, slowly over time. Our soul energy will degrade. I was told the end result is who we are, what we are, is siphoned off, drained, and used by the cabal in some way."

Bill: But we're eternal. There's no way that's possible, no way.

Gideon: "I thought that was well. Energy cannot be destroyed, Bill, but it can be moved, altered and changed. It seems the cabal wants to somehow break our souls apart in some way, siphon part of our energy away."

It is horrible what was told to me because at the end of it we, us, our souls, end up as empty, drained shells, drained of essence, energy, taken from us. There is more, but I was asked not to publicly say it now."

Bill: When can you say it? Ever? I think you should say it.

Gideon: "It could compromise them, though. It is the cabal's biggest secret, or one of them, one of the most highly classified. Not so much the augmented chip, though that maybe kept generally secret, but what the chip will really do to people and their souls, that is the secret. My sources are too valuable, and I do not want them to be hurt in any way. I will just do my best to continue to provide you the best information I can."

Bill: I feel a little drained after hearing that. Are you certain this is related to CSRQ and this augmented chip, and are you sure it can actually harm us, our souls, in this way?

Gideon: "That is what I have been told, and what I was told matched up with other information, so I do take it seriously. It is, as I said, one of the most terrifying things I have ever come across because it cuts to the heart of our eternal beings. I believe God needs to intervene to stop this in some way, but that is another discussion."

Bill: I need to talk to you privately. This won't be included in the Intel Drop.

Gideon: "Ok, we can do that."

[Private conversation concludes.]

Bill: Now you said Michael would add something to the end of this. Should we conclude things now, or is there anything else we should cover?

Gideon: "No, except to say that this Intel Drop could lead to escalation."

Bill: So more agents could attack us?

Gideon: "That would not surprise me at all. It is a containment measure. If our information was actually exposed on a mass scale, I do think it would be a problem for the cabal. Our goal was always to do that, but people took little effort to spread the Intel Drops and the message has not spread a great deal."

Bill: I agree, it's frustrating, but I want to thank everyone who has helped. A lot of people have helped, they have, I really appreciate it.

Gideon: "I do, as well, for those who have made the effort."

Bill: Before we end this, what do you think of the comms issues we had? Do you want to talk about that here?

Gideon: "The disruptions are either related to the meeting I had regarding the timelines I saw, or some of what the whistle-blowers are now telling me. So, there must be some concern by the cabal about something, we just do not know specifically what intel that is. They do not want you and I speaking at certain times, for whatever reason. Whereas before, the comms issues were minimal."

Bill: You know, I believe in God and divine intervention and I believe we are stronger than the cabal, even if we don't have the money, power or this tech they have, I think spiritually we are stronger. I like to believe no matter what, we will win.

Gideon: "I know we will win, and prevail. I more fear for those who will end up trapped in this system, CSRQ, or whatever the cabal will call it. I am terrified for them, because it seems it is going on just beyond controlled money and commerce, it is involving implants and almost a spiritual control of people."

Bill: We should do another Cosmic series-type Intel Drop that talks more about the spiritual side of things. Can we plan on that?

Gideon: "Yes, I would like to do that, because there are many things I need to update, a lot of new information has come in since we spoke on those matters."

Bill: Thank you for all of this, and please give our thanks to the whistle-blowers for putting their lives on the line. They are in our thoughts, and this person who came forward, if they read this, we're really thankful for them, too.

Gideon: "We are, and they do know that, Bill, because I have communicated that as much as I can."

Bill: Good. We'll talk again soon, God bless to you.

Gideon: "Blessings always, Bill."

Update: We continue to see serious problems with email. Emails like MSN, Me, iCloud, Outlook, AOL, Gmail, Gmx, Yahoo, Hotmail, Comcast and many others routinely BLOCK and CENSOR our emails. These email providers are also known to read your emails and offer no security at all. No one should be using them, but many people who contact us are using them.

We recommend opening an anonymous account using [Proton.me](#), [Skiff.com](#), [Hushmail.com](#), [Tutanota.com](#) or [Dnmx.org](#) (service for Dnmx.org may not be reliable). These providers are end to end encrypted, and have proven they do not block our emails.

Update: If you need help setting up Telegram (without using your real phone number), write to us at: securecommssov@proton.me - title "TG Account". We will provide the steps to create an anonymous Telegram account so that your real, personal phone number is not connected to it.
