

Elite Wall Faced Toilets: A Modern Solution for Your Bathroom

When it comes to upgrading your bathroom, the choice of toilet can significantly impact both the functionality and aesthetic of the space. One of the most stylish and practical options available today is the [Elite Wall Faced Toilet](#). Combining cutting-edge design, efficiency, and durability, these toilets offer a modern solution to suit a variety of bathroom styles. Whether you're renovating your home or building a new one, investing in a wall-faced toilet will not only elevate the look of your bathroom but also improve its performance.

In this article, we'll explore why Elite Wall Faced Toilets from Austpek Bathrooms are a perfect choice for your bathroom renovation. From their sleek design to the numerous benefits they offer, you'll understand why they are becoming increasingly popular in Australian homes.

What Are Wall Faced Toilets?

Before diving into the features of Elite Wall Faced Toilets, it's important to understand what makes them different from traditional toilets. Wall-faced toilets, as the name suggests, are mounted directly against the wall, with a compact design that integrates the toilet bowl and the wall seamlessly. This design eliminates the gap between the toilet and the wall, reducing the buildup of dust and grime that often accumulates in traditional toilets.

The wall-mounted style of these toilets also means that the cistern is typically concealed inside the wall, giving your bathroom a sleek and streamlined look. This hidden cistern reduces the visual clutter, creating a cleaner and more modern space.

Why Choose Elite Wall Faced Toilets?

There are several compelling reasons why Elite Wall Faced Toilets should be at the top of your list when selecting a new toilet for your bathroom. Let's look at some of the key advantages.

1. Space-Saving Design

For smaller bathrooms, maximizing space is essential. Wall-faced toilets are ideal in this regard, as they take up less floor space compared to traditional models. With the cistern concealed within the wall, the floor area is left open, making the bathroom feel larger and more spacious.

2. Easy to Clean

Cleaning a bathroom can be a hassle, especially around traditional toilets where dirt and grime accumulate in hard-to-reach places. With a wall-faced toilet, there are no gaps between the toilet and the wall, making it easier to clean both the toilet and the surrounding area. The smooth surface and minimalistic design also prevent dirt from sticking, so you'll spend less time scrubbing and more time enjoying your bathroom.

3. Contemporary Aesthetic

The sleek and modern appearance of wall-faced toilets enhances the overall design of your bathroom. Elite Wall Faced Toilets have a minimalist look that works well in both contemporary and traditional settings. Whether you're designing a luxury bathroom or simply updating your space, the stylish and understated design of these toilets will complement any bathroom style.

4. Durability and Quality

Elite Wall Faced Toilets are built to last. Made from high-quality materials, these toilets are designed to withstand the rigors of everyday use. Austpek Bathrooms' collection of wall-faced toilets is known for its durability, ensuring you get the most value out of your investment. These toilets are crafted with care to ensure they remain functional and attractive for years to come.

5. Water Efficiency

With increasing concerns about water conservation, choosing an environmentally-friendly toilet is more important than ever. Elite Wall Faced Toilets from Austpek are designed with water efficiency in mind. These toilets are equipped with a dual flush system that allows you to choose between a full flush and a reduced flush, reducing water waste and lowering your utility bills.

6. Silent Operation

Nobody enjoys a noisy toilet flush. The Elite Wall Faced Toilets are equipped with a silent flush mechanism that ensures a quieter operation. This is especially beneficial in households with multiple bathrooms or if you have a bathroom that's close to living spaces or bedrooms.

7. Increased Property Value

Upgrading your bathroom with high-quality, modern fixtures can increase the overall value of your property. Wall-faced toilets, with their clean lines and sleek design, are often considered a premium bathroom feature. This can make your home more appealing to potential buyers, should you ever decide to sell.

The Austpek Bathrooms Collection of Elite Wall Faced Toilets

You can browse their collection here to find a toilet that perfectly suits your bathroom's style.

Whether you are looking for a compact model for a small bathroom or a more luxurious design for a larger space, Austpek Bathrooms has you covered.

Installation and Maintenance of Elite Wall Faced Toilets

One of the reasons people hesitate to install wall-faced toilets is the perceived complexity of installation. However, with the right professional installer, the process is straightforward. The concealed cistern requires wall alterations, but this can be handled with ease by experienced plumbers or bathroom renovators.

Additionally, maintenance is a breeze. The absence of exposed pipes and cisterns reduces the likelihood of maintenance issues over time. The smooth surfaces also make it easy to spot any issues, ensuring that you can address them quickly before they become bigger problems.

Elite Wall Faced Toilets are an excellent choice for anyone looking to modernize their bathroom. Their space-saving design, easy cleaning, and water efficiency make them a practical and stylish addition to any home. With the range of high-quality options available at Austpek Bathrooms, you're sure to find a toilet that suits your needs and enhances your bathroom's aesthetic.

Don't settle for anything less than the best when it comes to your bathroom. Browse the collection of Elite Wall Faced Toilets at Austpek Bathrooms and take the first step toward creating a more functional, beautiful, and modern bathroom.
