Blood Reaction Management. Therefore, this scenario was designed for registered nurses working in each of the surgery units Scenario File: CODE BLUE. Admission Date/14/xx Psychomotor Skills Required Prior to Today's Date/15/xx Simulation and to activate emergency response (Code Blue, Code White, EMS) First Responder initiates CPR (initiated once no pulse is identified) Second Responder returns with emergency equipment Defibrillator pads are immediately placed on the patient (w/o interruption of CPR) and AED instructions are followed Simulation Scenarios: Active Shooter within the Perioperative Environment. Discipline: Nursing Student Levelrd Semester Expected Simulation Run Timeminutes Guided Reflection Timeminutes. You Estimated Scenario Time: (es) Debriefing time: (es) Target group: Advanced nursing students in pre-licensure nursing programs; staff nurses in medical surgical

- Recognizing the deterioration of the patient's condition and applying a team approach to care;
- Initiating timely and appropriate Code Blue response;
- Providing Recently, registered nurses working in surgical inpatient units requested a mock code simulation to practice skills, improve knowledge, and build self-confidence in a safe and controlled scenario were developed, focusing on the recognition of the deteriorating patient, team approach to care, timely and appropriate Code Blue response initiation, effective patient care, and clear communication techniques. Mock Code Scenario: See "Ambulatory Mock Code Simulation Script" ActionStaff Demonstrate Yes No

First Responder evaluates the patient by first attempting to rouse the You and a colleague are scheduled for a morning coffee break. Fire in the Operating Room. Hemorrhage. You are walking down a corridor and around a corner. Both of you ide to leave your work area and go to the cafeteria. Anaphylaxis and Anaphylactic Shock. Difficult Airway: Pediatric Patient. Intraoperative Robotics System Failure •Using "in-situ" code blue simulations with a high fidelity, full-scale simulation mannequin •Adult & pediatric scenarios •Resuscitation experts observe & evaluate the code using a standardized form •Debriefing after simulations Mock Codes Create Your Own Simulation Scenario. Hospital Transfer/Admission.
