1. For a civil engineer there is little chance of mistakes, whether it is in the construction process or making the documents. Since the majority of civil structures are difficult to repair due to the expense of reconstruction, even a tiny error could be expensive. This

can result in huge liability and responsibility on you. We are also known as the [Top BBA Colleges in Patna](#).

2. Along with a lot of responsibility You must also adhere to deadlines and obligations of a contracts, which can be stressful at times. Check out our [blog](#).

3. Since civil projects are usually longer-lasting. Therefore, if you are required to work outdoors in a remote locations, it could be very boring. If you absolutely hate working outside and prefer a desk job then this might not be the right choice for you. You can, however, limit yourself to drawing and designing structural designs.

4. When the economy is in a slump construction volume is also impacted. This could affect your job prospects when there is a high supply of civil engineer We are also known as [Top BCA Colleges in Patna](#).

5. As with service industry in which there are limits on the amount you can earn. There are people who become millionaires or billionaires through apps, or movie stars becoming rich in a one hit. But that's not feasible in this industry. However, once you reach a respected level in career and own a construction/consulting company, you can make hefty income as projects with huge amount of money are handled. For more [about us](#).
