Teaching students with autism: Strategies for secondary school teachers This resource provides an introduction to challenges that students with autism spectrum disorder may encounter in . There are several strategies that can assist these students to learn effectively: Get to know the student's particular needs in advance - meet her/him before the course starts to discuss . Structured teaching is an approach in instructing children with autism. It allows for implementation of a variety of instructional methods (e.g., visual support strategies, Picture Exchange . Structured teaching is an approach in instructing children with autism. It allows for implementation of a variety of instructional methods (e.g., visual support strategies, Picture Exchange Communication System - PECS, sensory integration strategies, discrete trial. • Use peer-mediated strategies to help facilitate social interactions between students and help ASD students acquire new social skills. • Foster social skills through providing direct instruction and teaching the student how to interact. Each strategy can be used for students with ASD, regardless of age, but modified appropriately for their individual needs throughout their school years. These strategies address common issues related to the social, behavioural, and academic challenges that most students with ASD experience.
