Google provides 2 editions of applications plus the following paragraphs will elaborate on benefits and drawbacks from the [Standard Edition Google Apps Account](#).

### Description

The Google Apps regular edition is offered at no cost to people that choose to get a feel of applying Google applications that will assist boost organization productivity whilst minimizing fees of operation. The typical edition presents benefits which might be suited for individuals who need to test out these applications prior to purchasing them.

### What is Google Apps?

Google Apps is usually a suite of Google applications that brings together crucial solutions to help your business. That is a hosted service that lets organizations, schools, and institutions use various Google products - including E-mail, Google Drive, Google Docs, Google Calendar, and Google Speak - on a special domain (e.g., [www.example.com](http://www.example.com)).

For instance, should you own the domain [instance.com](http://instance.com) and also you sign up for Google Apps solutions, every person at your organization will get :

A custom e-mail address ([user@example.com](mailto:user@example.com))

Google Drive access

Tools for word processing

Spreadsheets and presentations

A shared calendaring system

Tools for developing internet pages and web sites for your business

And substantially, substantially more!

## Cons

The major disadvantage of utilizing Google typical is the fact that, users can't use the company applications which can be presented to boost productivity though decreasing IT costs along with other organization expenses. A further disadvantage of making use of Google apps normal is the fact that within this cost-free version only a maximum of ten customers are allowed per organization. Google apps small business however enables unlimited users to delight in the presented benefits. The normal version also does not Google Video for Small business applications and Google Group for Business enterprise Applications.

## Google Apps Company Edition

Extra features like a variety of accounting, IT and finance applications are presented to enterprise customers. Every user who opts for the company edition is allotted 25 Giga bytes of e-mail space. Other characteristics like 99.9% uptime assure as well as SLA and 24/7 help are presented to company customers.

## Conclusion

The Google apps regular edition is perfect for companies who wish to test out these applications and obtain them later on. The [Standard Edition Google Apps Account](#) can also be made use of by little organizations that are on a budget and do not would like to invest a good deal of money on applications. Business owners who're seeking to improve productivity and lessen operation costs may well choose to contemplate upgrading to business applications after they are satisfied together with the solutions provided. Enterprise owners may also add applications later on by visiting the Google apps industry place.
